

NSS Activities as part of Lakshya-2K17

To motivate and creating an awareness among the students of LBRCE and Outside Participants, LBRCE NSS Unit conducted two programs on the occasion of LAKSHYA-2K17, A 12th National Level Technical Symposium which was conducted by LBRCE on 15-09-2017 (Friday).

Program 1. "Go-Green" (One Tree-One Family)

The objective of this program is Plant one Tree by each family then automatically the next generation people will get benefited from Global Warming. In this regard NSS Unit distributed 1500 fruit and other tree saplings to outside participants, parents and LBRCE students and their families.

Last year also we distributed 1500 saplings for the same occasion.

This year we conducted another important Program as " Save the Rivers"

Program 2. Save the Rivers (Water Care for next Generation)

Rivers are our natural resources. If they become dry all the people will phase the water problem. It's our primary responsibility to save water and the water resources. Present only 50% of rivers are in pretty worst condition and the availability of water is only 32%. In order to save the next generation it's our duty to save the rivers from garbage, waste materials, plastic items and other things.

So try to save the water from our utilities and help to next generation people.

These two programs were inaugurated bt Mr.M.S.R.Murthy, TCS Delivery Head.

NSS Team in the Rally on Save the River and Go-Green with placards

LAKSYA-2K17 Chief Guest Mr.M.S.R.Murthy, TCS Delivery Head, planting the tree

M.S.R.Murthy, TCS Delivery Head, distributing the saplings to the participants
