Press Clippings : Nil

REPORT

The Second year B. Tech. Civil Engineering students (2024 Batch) of Lakireddy Balireddy College of Engineering Mylavaram have underwent an Industrial visit to the Electric Loco Shed, Vijayawada on 18-03-2026.

Students learned about the maintenance and operation of electric locomotives. The Electric Loco Shed at Vijayawada is one of the major maintenance hubs under Indian Railways. It handles periodic inspection, repair, and servicing of electric locomotives used for both passenger and freight transport. The shed is equipped with advanced tools, diagnostic systems, and trained personnel. Students observed various sections such as the inspection bay, repair units, and testing areas. Officials explained safety protocols followed in handling high-voltage equipment.

The industrial visit to the Electric Loco Shed, Vijayawada, was highly informative and beneficial. It successfully met its objectives by offering students firsthand experience of locomotive maintenance and railway operations. Such visits are essential for developing technical competence and industry readiness among students.
