#### DEPARTMENT OF CIVIL ENGINEERING

# COURSE HANDOUT PART-A

Name of Course Instructor: Mr B.SAGAR Course Name & Code : PC-II, 20FE02

L-T-P Structure : 2-0-0

**Program/Sem/Sec** : CIVIL -II SEM **A.Y.** : 2021-22

PREREQUISITE : NIL

**COURSE EDUCATIONAL OBJECTIVES (CEOs):** To improve English language proficiency of the students on various aspects like vocabulary, grammar, communication skills, listening skills, Reading & Writing skills.

**COURSE OUTCOMES (COs):** At the end of the course, student will be able to

CO1	Produce a coherent paragraph interpreting a figure/graph/chart/table.	L2
CO2	Comprehend the given texts thoroughly by guessing the meanings of the words Contextually.	L2
соз	Use language appropriately for describing/comparing/contrasting/giving directions & suggestions.	L1
CO4	Write formal/informal dialogues with an understanding of verbal/non-verbal features of communication. Guess meanings of the words from the context.	L2
CO5	Write well structured essays; Reports &Résumé.	L3

#### **UNIT-I**

**Fabric of Change-**'H.G. Wells and the Uncertainties of Progress–Peter J. Bowler'; Reading: Studying the use of Graphic elements in texts; Grammar & Vocabulary: Quantifying Expressions; Adjectives and adverbs; Comparing and Contrasting; Degrees of Comparison; Writing: Information Transfer.

#### **UNIT-II**

Tools for Life - 'Leaves from the Mental Portfolio of a Eurasian - Sui Sin Far';

Reading: Global Comprehension; Detailed Comprehension; Grammar & Vocabulary: Active & Passive Voice; Idioms & Phrases; Writing: Structured Essays using suitable claims and evidences.

#### **UNIT-III**

**'Homi Jahangir Bhabha'**; Grammar & Vocabulary: Words often confused; Common Errors; Writing: Incident & Investigation Reports.

#### **UNIT-IV**

'Jagadish Chandra Bose'; Grammar & Vocabulary: Use of antonyms; Correction of Sentences; Writing: Dialogue Writing.

#### **UNIT-V**

'**Prafulla Chandra Ray'**; Grammar & Vocabulary: Analogy; Sentence Completion; Writing: Writing a Résumé

#### **COURSE ARTICULATION MATRIX** (Correlation between COs, POs & PSOs):

COs	P01	P02	P03	P04	P05	P06	P07	P08	P09	PO10	P011	PO12	PSO1	PSO2	PSO3

# **EVALUATION PROCESS (R17 Regulation):**

Evaluation Task	Marks
Assignment-I (Units-I, II & UNIT-III (Half of the Syllabus))	A1=5
I-Descriptive Examination (Units-I, II & UNIT-III (Half of the Syllabus))	M1=15
I-Quiz Examination (Units-I, II & UNIT-III (Half of the Syllabus))	Q1=10
Assignment-II (Unit-III (Remaining Half of the Syllabus), IV & V)	A2=5
II- Descriptive Examination (UNIT-III (Remaining Half of the Syllabus), IV & V)	M2=15
II-Quiz Examination (UNIT-III (Remaining Half of the Syllabus), IV & V)	Q2=10
Mid Marks =80% of Max ((M1+Q1+A1), (M2+Q2+A2)) + 20% of Min ((M1+Q1+A1), (M2+Q2+A2))	M=30
Cumulative Internal Examination (CIE): M	<mark>30</mark>
Semester End Examination (SEE)	70
Total Marks = CIE + SEE	100

# PART-D

# PROGRAMME OUTCOMES (POs):

PO 1 Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.  Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.  Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.  Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.  Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations  The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice  Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development  PO 8 Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.  PO 9 Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.  Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effe		
PO 2 Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.  Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.  Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.  Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations  The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice  Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development  Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.  PO 9  Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.  PO 10  Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions  Project management and finance: Demonstrate knowledge and understanding of the en	PO 1	
problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. #### DEPARTMENT OF CIVIL ENGINEERING

## COURSE HANDOUT PART-A

Name of Course Instructor : Dr.J.Venkateswara Rao

**Course Name & Code** : APPLIED MECHANICS&20CE03

**L-T-P Structure** : 2-1-0 Credits : 3

Program/Sem/Sec : B.Tech., CE., II-Sem., A.Y : 2021-22

**PRE-REQUISITE**:Physics

**COURSE EDUCATIONAL OBJECTIVES (CEOs):** This course comprises the basic knowledge on equilibrium of planar force systems, determination of sectional properties of various cross sections / composite sections. It describes motion of bodies under frictional forces. In this course the process of finding the internal forces in members aroused from the applied loads using equilibrium conditions is also expounded.

**COURSE OUTCOMES (COs):** At the end of the course, students are able to

CO 1	Determine the resultant force and moment for a given system of forces.
CO 2	Calculate the unknown forces in members of planar systems by constructing free body
	diagrams and applying static equilibrium conditions.
CO 3	Examine the motion/ impeding the motion of bodies on horizontal/inclined planes
	associated with frictional forces.
CO 4	Analyze for the internal forces in the members of a pin jointed perfect frames subjected to
	horizontal, vertical and inclined loads.
<b>CO5</b>	Determine the centroid and second moment of area of simple and composite areas.

**COURSE ARTICULATION MATRIX** (Correlation between COs, POs & PSOs):

COs	P01	P02	P03	P04	P05	P06	P07	P08	P09	PO10	P011	PO12	PSO1	PSO2	PSO3
CO1	3											1	1		2
CO2	3											1	1		2
СО3	3											1	1		2
CO4	3											1	1		2
CO5	3											1	1		2

**Note:** Enter Correlation Levels **1** or **2** or **3**. If there is no correlation, **put '-'** 

1- Slight (Low), 2 - Moderate (Medium), 3 - Substantial (High).

## **EVALUATION PROCESS (R20Regulations):**

Evaluation Task	Marks
Assignment-I (Units-I, II& UNIT-III (Half of the Syllabus))	A1=5
I-Descriptive Examination (Units-I, II& UNIT-III (Half of the Syllabus))	M1=15
I-Quiz Examination (Units-I, II& UNIT-III (Half of the Syllabus))	Q1=10
Assignment-II (Unit-III (Remaining Half of the Syllabus), IV & V)	A2=5
II- Descriptive Examination (UNIT-III (Remaining Half of the Syllabus), IV & V)	M2=15
II-Quiz Examination (UNIT-III (Remaining Half of the Syllabus), IV & V)	Q2=10
Mid Marks =80% of Max ((M1+Q1+A1), (M2+Q2+A2)) + 20% of Min ((M1+Q1+A1), (M2+Q2+A2))	M=30
Cumulative Internal Examination (CIE): M	30
Semester End Examination (SEE)	70
Total Marks = CIE + SEE	100

# PART-D

## PROGRAMME OUTCOMES (POs):

PO 1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering
PO 2	problems. <b>Problem analysis</b> : Identify, formulate, review research literature, and analyze complex
	engineering problems reaching substantiated conclusions using first principles of mathematics,
	natural sciences, and engineering sciences.
PO 3	<b>Design/development of solutions</b> : Design solutions for complex engineering problems and
	design system components or processes that meet the specified needs with appropriate
	consideration for the public health and safety, and the cultural, societal, and environmental
DO 4	considerations.
PO 4	<b>Conduct investigations of complex problems</b> : Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of
	the information to provide valid conclusions.
PO 5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern
	engineering and IT tools including prediction and modelling to complex engineering activities
	with an understanding of the limitations
PO 6	The engineer and society: Apply reasoning informed by the contextual knowledge to assess
	societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to
	the professional engineering practice
PO 7	<b>Environment and sustainability</b> : Understand the impact of the professional engineering
	solutions in societal and environmental contexts, and demonstrate the knowledge of, and need
DO 0	for sustainable development.
PO 8	<b>Ethics</b> : Apply ethical principles and commit to professional ethics and responsibilities and
PO 9	norms of the engineering practice.  Individual and team work: Function effectively as an individual, and as a member or leader in
FU 9	diverse teams, and in multidisciplinary settings.
PO 10	<b>Communication</b> : Communicate effectively on complex engineering activities with the
1010	engineering community and with society at large, such as, being able to comprehend and
	write effective reports and design documentation, make effective presentations, and give and
	receive clear instructions.
PO 11	Project management and finance: Demonstrate knowledge and understanding of the
	engineering and management principles and apply these to one's own work, as a member and
	leader in a team, to manage projects and in multidisciplinary environments.
PO 12	<b>Life-long learning</b> : Recognize the need for, and have the preparation and ability to engage in
	independent and life-long learning in the broadest context of technological change.

## PROGRAMME SPECIFIC OUTCOMES (PSOs):

<b>PSO 1</b>	Possesses necessary skill set to analyze and design various systems using analytical and
	software tools related to civil engineering
<b>PSO 2</b>	Possesses ability to plan, examine and analyse the various laboratory tests required for the
	professional demands
<b>PSO</b> 3	Possesses basic technical skills to pursue higher studies and professional practice in civil
	engineering domain

# PART-D

# **PROGRAMME OUTCOMES (POs):**

	Engineering knowledge: Apply the knowledge of mathematics, science, engineering
PO 1	fundamentals, and an engineering specialization to the solution of complex
	engineering problems.
	Problem analysis: Identify, formulate, review research literature, and analyze
PO 2	complex engineering problems reaching substantiated conclusions using first
	principles of mathematics, natural sciences, and engineering sciences.
	<b>Design/development of solutions</b> : Design solutions for complex engineering
PO 3	problems and design system components or processes that meet the specified needs
	with appropriate consideration for the public health and safety, and the cultural,
	societal, and environmental considerations.
	Conduct investigations of complex problems: Use research-based knowledge and
PO 4	research methods including design of experiments, analysis and interpretation of
	data, and synthesis of the information to provide valid conclusions.
	<b>Modern tool usage</b> : Create, select, and apply appropriate techniques, resources, and
PO 5	modern engineering and IT tools including prediction and modelling to complex
	engineering activities with an understanding of the limitations
	<b>The engineer and society</b> : Apply reasoning informed by the contextual knowledge
PO 6	to assess societal, health, safety, legal and cultural issues and the consequent
	responsibilities relevant to the professional engineering practice
	Environment and sustainability: Understand the impact of the professional
PO 7	engineering solutions in societal and environmental contexts, and demonstrate the
	knowledge of, and need for sustainable development.
PO 8	Ethics: Apply ethical principles and commit to professional ethics and
	responsibilities and norms of the engineering practice.
PO 9	<b>Individual and team work</b> : Function effectively as an individual, and as a member
	or leader in diverse teams, and in multidisciplinary settings.
	<b>Communication</b> : Communicate effectively on complex engineering activities with
PO 10	the engineering community and with society at large, such as, being able to
	comprehend and write effective reports and design documentation, make effective
	presentations, and give and receive clear instructions.
	Project management and finance: Demonstrate knowledge and understanding of
PO 11	the engineering and management principles and apply these to one's own work, as a
	member and leader in a team, to manage projects and in multidisciplinary
	environments.
	<b>Life-long learning</b> : Recognize the need for and have the preparation and ability to
PO 12	engage in independent and life-long learning in the broadest context of technological
	change.

#### DEPARTMENT OF CIVIL ENGINEERING

# **COURSE HANDOUT**

#### **PART-A**

: Eeshwar Ram.J Name of Course Instructor

Course Name & Code : CONSTITUTION OF INDIA (20MC01)

L-T-P Structure : 2-0-0 Credits: 0 Program/Sem/Sec : B.Tech., CE., II-Sem., A.Y: 2021-22

PRE-REQUISITE: Understand the Indian Constitution

#### **COURSE EDUCATIONAL OBJECTIVES (CEOs):**

- To enable the student to understand the importance of constitution
- To understand the structure of Executive ,Legislature and Judiciary.
- To Understand Philosophy of fundamental rights and duties.
- To Understand the autonomous nature of constitution bodies like Supreme Court and High Court Controller and Auditor General of India and Election Commision of India
- To Understand the Central and State relation, financial and administrative.

#### **COURSE OUTCOMES (COs):** At the end of the course, students are able to

CO 1	Understand history and philosophy of constitution with reference to preamble,
	Fundamental Rights and Duties.
CO 2	Understand the concept of Unitary and Federal Government along with the role of
	President, Prime Minister and Judicial System.
CO 3	Understand the structure of the state government, Secretariat, Governor and Chief Minister
	and their functions.
CO 4	Learn local administration viz. Panchayat, Block, Municipality and Corporation.
CO 5	Learn about Election Commision and the process and about SC,ST,OBC and women.

#### **COURSE ARTICULATION MATRIX**(Correlation between COs. POs & PSOs):

COs	PO	P01	P01	P01	PSO	PSO	PSO

# **EVALUATION PROCESS (R20 Regulation):**

Evaluation Task	Mark s
Assignment – I (Units-I, II & UNIT-III (Half of the Syllabus))	A1 = 5
I – Descriptive Examination (Units-I, II & UNIT-III (Half of the Syllabus))	M1 = 15
I – Quiz Examination (Units-I, II & UNIT-III (Half of the Syllabus))	Q1 = 10
Assignment – II (Unit-III (Remaining Half of the Syllabus), IV & V)	A2 = 5
II – Descriptive Examination (UNIT-III (Remaining Half of the Syllabus), IV & V)	M2 = 15
II – Quiz Examination (UNIT-III (Remaining Half of the Syllabus), IV & V)	Q2 = 10
Mid Marks = 80% of Max ((M1+Q1+A1), (M2+Q2+A2)) + 20% of Min ((M1+Q1+A1), (M2+Q2+A2))	M=30
Cumulative Internal Examination (CIE): M	<mark>30</mark>
Semester End Examination (SEE)	<mark>70</mark>
Total Marks = CIE + SEE	100

PROGRAMME OUTCOMES (POs):

Figure Fing Incoveledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.  Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.  Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.  Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.  Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations  The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues, and the consequent responsibilities relevant to the professional engineering practice  Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.  Post individual and teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.  Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.  Project management and	1 NOUN	AMME OUTCOMES (FOS):

Name of Course Instructor : Mr. V. V. Krishna Reddy

Course Name & Code : Programming for Problem Solving Using C Lab (20CS51)

L-T-P Structure : 0-0-3 Credits : 1.5

Program/Sem/Sec : B.Tech. – CIVIL / II Sem A.Y. : 2021-22

#### PRE-REQUISITE: Programming and Problem-Solving Skills

**COURSE EDUCATIONAL OBJECTIVE (CEO):** The objective of the course is to learn the basic elements of C Programming Structures like Data Types, Expressions, Control Statements, and Various I/O Functions and to solve simple mathematical problems using control structures. Design and implementation of various software components, which solve real world problems.

**COURSE OUTCOMES (COs):** At the end of the course, the student will be able to:

CO1:	Apply control structures of C in solving computational problems.	Apply – Level
CO2:	Implement derived data types & use modular programming in problem solving	Apply – Level
CO3:	Implement user defined data types and perform file operations.	Apply – Level
CO4:	Improve individual / teamwork skills, communication & report writing skills with ethical values.

L-T-P Structure : 0-0-2 Credits: 01

**Program/Sem/Sec** : CIVIL –II SEM **A.Y.** : 2020-21

PREREQUISITE : NIL

**COURSE EDUCATIONAL OBJECTIVES (CEOs)**: To improve the proficiency of students in English with an emphasis on better communication in formal and informal situations; Develop speaking skills required for expressing their knowledge and abilities and to face interviews with confidence.

**COURSE OUTCOMES (COs):** At the end of the course, student will be able to

CO1	Introduce one-self and others using appropriate language and details.	L2
CO2	Comprehend short talks and speak clearly on a specific topic using	L2
соз	Report effectively after participating in informal discussions ethically.	L1
<b>CO4</b>	Interpret data aptly, ethically & make oral presentations without	L3

## Syllabus: Professional Communication Lab (PCS) shall have two parts:

- Computer Assisted Language Learning (CALL) Lab for 60 students with 60 systems, LAN facility and English language software for self-study by learners.
- Interactive Communication Skills (ICS) Lab. with movable chairs and audiovisual aids with a P.A System, a T. V., a digital stereo audio & video system and camcorder etc.

#### Exercise- I

**CALL Lab: Understand-** Sentence structure.

**ICS Lab: Practice** -Listening: Identifying the topic, the context and specific information, Speaking: Introducing oneself and others.

#### Exercise-II

**CALL Lab: Understand-** Framing questions.

**ICS Lab: Practice-** Listening: Answering a series of questionsaboutmainideaandsupportingideasafterlisteningtoaudiotext.

Speaking: Discussing in pairs/small groups on specific topics; Delivering short structured talks using suitable cohesive devices (JAM)

#### Exercise-III

**CALL Lab: Understand-** Comprehension practice–Strategies for Effective Communication **ICS Lab: Practice -** Listening: Listening for global comprehension and Summarizing Speaking: Discussing specific topics in pairs/small groups, reporting what is discussed

#### Exercise-IV

**CALL Lab: Understand-** Features of Good Conversation–Strategies for Effective Communication.

ICS Lab: Practice -Listening: making predictions while listening to conversations/transactional dialogues with/without video Speaking: Role – plays – formal & informal – asking for and giving information/directions/instructions/suggestions

#### Exercise-V

**CALL Lab: Understand-** Features of Good Presentation, Methodology of Group Discussion

**ICS Lab: Practice** –Introduction to Group Discussions.

Listening: Answering questions, identifying key terms and understanding concepts.

Speaking: Formal Oral & Poster presentations on topics from academic contexts without the use of PPT.

#### Lab Manual:

1. Prabhavati .Y & etal, "English All Round–Communication Skills for Undergraduate Learners", Orient Black Swan, Hyderabad, 2019.

#### **Suggested Software:**

- 1. Digital Mentor: Globarena, Hyderabad, 2005
- 2. Sky Pronunciation Suite: Young India Films, Chennai, 2009
- 3. Mastering English in Vocabulary, Grammar, Spelling, Composition, Dorling Kindersley, USA, 2001
- 4. Dorling Kindersley Series of Grammar, Punctuation, Composition, USA, 2001
- 5. Oxford Talking Dictionary, The Learning Company, USA, 2002
- 6. Learning to Speak English- 4CDs. The Learning Company, USA, 2002

PROGRAM : B.Tech., II-Sem., CIVIL

ACADEMIC YEAR : 2021-2022

COURSE NAME & CODE : ENGINEERING PHYSICS LAB & 20 FE 55

L-T-P STRUCTURE : 0-0-3

COURSE CREDITS : 1.5

COURSE INSTRUCTOR : Mr. N. T. Sarma / Dr. P. V. N. Kishore

COURSE COORDINATOR : Dr. P. V. N. Kishore

### **Course Educational Objective:**

The theoretical ideas, Analytical techniques, graphical analysis and concepts covered in the lecture by completing a host of experiments with the procedures and observational skills for appropriate use of simple and complex apparatus.

**Course Outcomes:** At the end of the course, the student will be able to,

CO1: Analyze the wave characteristics of light(Understand – L2).

CO2: Determine the wavelength of laser source and width of slit(Apply - L3).

CO3: Estimate the magnetic field using Stewart's and Gee's apparatus and the rigidity modulus of material using Torsional Pendulum(Understand - L2).

CO4: Identify the phenomena of resonance in strings(Understand – L2).

CO5: Improve report writing skills and individual team work with ethical values(Understand – L2)

### **PROGRAM OUTCOMES:** Engineering Graduates will be able to:

- (1). **Engineering knowledge**: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- (2). **Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- (3). **Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- (4). Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- (5). **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- (6). The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- (7). Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- (8). Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- (9). Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- (10). Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- (11). Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- (12).Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## AKIREDDY BALI REDDY COLLEGE OF ENGINEERING

(Autonomous)

Approved by AICTE, New Delhi and Permanently Affiliated to JNTUK, Kakinada Accredited by NAAC and NBA (CSE, IT, ECE, EEE & ME) under Tier - I

#### DEPARTMENT OF CIVIL ENGINEERING

#### **COURSE HANDOUT**

**PROGRAM** : B.Tech, II-Sem., CIVIL

ACADEMIC YEAR : 2021-22

**COURSE NAME & CODE** : Computer Aided Engineering Graphics (20ME54)

L-T-P STRUCTURE : 0-0-3

COURSE CREDITS : 1.5

**COURSE INSTRUCTOR** : Dr. V.Ramakrishna / Dr. K.V.Ramana/Ms. P.Keerthi

**COURSE COORDINATOR** : Dr. V.Ramakrishna

**PRE-REQUISITE** : Engineering Graphics, Mathematics

#### **COURSE EDUCATIONAL OBJECTIVE:**

The course aims to teach developing and drawing of engineering objects using AutoCAD. The student will be taught the fundamentals of AutoCAD and then asked to develop the projections of objects related to straight lines, planes, solids, orthographic and isometric views, development of surfaces using principles of engineering drawing.

**COURSE OUTCOMES:** At the end of the course, the student will be able to:

CO1: Draw simple objects using functional tools in AutoCAD. (Understand-L2)

CO2: Develop and draw the positions and views of points, lines, planes and solids using AutoCAD. (Understand-L2)

CO3: Develop and draw the orthographic and isometric projections of simple objects using AutoCAD. (**Understand-L2**)

CO4 : Develop and draw the projections of the solids by developing the surfaces using AutoCAD.(**Understand-L2**)

### COURSE ARTICULATION MATRIX (Correlation between Cos & POs, PSOs):

COs	P	P	P	P	P	P	P	P	P	P	P	P	PS	PS	PS
	0	$\begin{array}{ c c }\hline O\\ 2\end{array}$	O 3	O 4	O 5	O 6	O 7	O 8	O 9	O 10	O 11	O 12	O 1	O 2	O 3
	1		3	4	3	U	,	0	9	10	11	12	1		3
CO1	3	3	3	1			1			1			3	1	
CO2	3	3	3	1			1			1			3	1	
СОЗ	3	3	3	1			1			1			3	1	
CO4	3	3	3	1			1			1			3	1	

Note: Enter Correlation Levels 1 or 2 or 3. If there is no correlation, put '-'

1- Slight (Low),

2 – Moderate (Medium),

**3 -** Substantial (High).

### **COMPUTER AIDED ENGINEERING GRAPHICS (20ME54)**

### LIST OF EXPERIMENTS

COURSE: II SEMESTER A.Y: 2021-2022

#### **I CYCLE**

- 1. Basic drawing commands (line, circle, arc, ellipse, polygon, and rectangle).
- **2.** Edit commands (copy, move, erase, zoom).
- **3.** Array commands (polar array, rectangular array, P-edit, divide, pline, offset).
- **4.** Hatching &line commands (hatching with different angles and different types of lines).
- **5.** Mirror and trim commands (mirror an object, trim, extend a line, chamfer &fillet, explode).
- **6.** Dimensioning & text commands (linear, angular, radius, diameter and text).

### **II CYCLE**

- 1. Projection of points (I, II, III, & IV quadrants).
- 2. Projection of lines parallel to both reference planes.
- 3. Projection of lines parallel to one reference plane & inclined to other reference plane.
- 4. Projection of planes: Single stage projections.
- 5. Projection of solids in simple position and transfer of points.
- 6. Projection of solids with axes inclined to one reference plane & parallel to other.

Lab-In charge

**Batch:** 20761A0101 to 20761A0158

## ACADEMIC CALENDAR

Description	From	То	Weeks
I Phase of Instructions	02-05-2022	18-06-2022	7 W
I Mid Examinations	20-06-2022	25-06-2022	1 W
II Phase of Instructions	27-06-2022	13-08-2022	7 W
II Mid Examinations	15-08-2022	20-08-2022	1 W
Preparation and Practical	22-08-2022	27-08-2022	1 W
Semester End Examinations	29-08-2022	10-09-2022	2 W

## **PROGRAMME OUTCOMES (POs):**

PO 1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering
	fundamentals, and an engineering specialization to the solution of complex engineering
	problems.
PO 2	Problem analysis: Identify, formulate, review research literature, and analyze complex
	engineering problems reaching substantiated conclusions using first principles of
	mathematics, natural sciences, and engineering sciences.
PO 3	<b>Design/development of solutions</b> : Design solutions for complex engineering problems
	and design system components or processes that meet the specified needs with
	appropriate consideration for the public health and safety, and the cultural, societal, and
	environmental considerations.
PO 4	Conduct investigations of complex problems: Use research-based knowledge and
	research methods including design of experiments, analysis and interpretation of data,
	and synthesis of the information to provide valid conclusions.
PO 5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and
	modern engineering and IT tools including prediction and modeling to complex
70.6	engineering activities with an understanding of the limitations.
<b>PO</b> 6	The engineer and society: Apply reasoning informed by the contextual knowledge to
	assess societal, health, safety, legal and cultural issues and the consequent responsibilities
DO -	relevant to the professional engineering practice.
<b>PO 7</b>	<b>Environment and sustainability</b> : Understand the impact of the professional engineering
	solutions in societal and environmental contexts, and demonstrate the knowledge of, and
DO 0	need for sustainable development.
PO 8	<b>Ethics</b> : Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO 9	Individual and team work: Function effectively as an individual, and as a member or
109	leader in diverse teams, and in multidisciplinary settings.
PO 10	Communication: Communicate effectively on complex engineering activities with the
1010	engineering community and with society at large, such as, being able to comprehend and
	write effective reports and design documentation, make effective presentations, and give
	and receive clear instructions.
PO 11	Project management and finance: Demonstrate knowledge and understanding of the
	engineering and management principles and apply these to one's own work, as a member
	and leader in a team, to manage projects and in multidisciplinary environments.
PO 12	<b>Life-long learning</b> : Recognize the need for, and have the preparation and ability to
	engage in independent and life-long learning in the broadest context of technological
	change.
	· · ·

## PROGRAMME SPECIFIC OUTCOMES (PSOs):

PSO 1				
	Possesses necessary skill set to analyze and design various systems using analytical and			
	software tools related to civil engineering			
PSO 2	Possesses ability to plan, examine and analyze the various laboratory tests required for			
	the professional demands			
PSO 3	Possesses basic technical skills to pursue higher studies and professional practice in civil			
	engineering domain
