Outcome of event : Products from waste

Description / Report on Event:

Prakruthi- The Environmental club of LBRCE yet with an another magnificent effort to bring in change has pioneered an another event intended this time to not only the fraternity of Lakireddy Bali Reddy College of Engineering but also to the national level representatives with stage being set up at Lakshya 2K18, The 21st National Technical and Cultural Symposium of the Lakireddy Bali Reddy College of Engineering.

Prakruthi has been associated with ITC Limited, India for this event. The representatives from the ITC Limited trained few of our handpicked, best at job volunteers in creating the awareness on reusing the household by products. With this motivation and guidance Prakruthi organised a competition which encourages students of LBRCE to create a useful yet attractive state of art crafts. The crafts were then displayed on the day of the event, Lakshya 2K18 i.e. 27-Dec-2018 at campus premises. The craft creators were also given a chance to sell their crafts. This ensured the intended audience to appreciate the beauty hidden in the household by products they usually dispose.

Our volunteers had also done a pretty good job at educating the people attending the event. The crafts were also judges based on the contest theme, usefulness and attractiveness of the craft and were awarded the winner and runner up prizes.
