# LAKIREDDY BALI REDDY COLLEGE OF ENGINEERING DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING 

(Autonomous \& Affiliated to JNTUK, Kakinada \& Approved by AICTE, New Delhi,
NAAC Accredited with 'A' grade, Certified by ISO 9001:2015)
L B Reddy Nagar, Mylavaram-521 230, Krishna District, Andhra Pradesh.

## COURSE HANDOUT

## PROGRAM

ACADEMIC YEAR
COURSE NAME \& CODE
: B.Tech, VI-Sem., CSE
: 2017-18
: Compiler design - S163

L-T-P STRUCTURE : 3-1-0
COURSE CREDITS : 3
COURSE INSTRUCTOR : Dr. D. Veeraiah
COURSE COORDINATOR : Dr. D. Veeraiah
PRE-REQUISITE: knowledge in Theory of Computation

COURSE OBJECTIVE: To introduce the major concept areas of language translation and compiler design and enrich the knowledge in various phases of compiler ant its use, code optimization techniques, machine code generation, and use of symbol table. To provide practical programming skills necessary for constructing a compiler.

## COURSE OUTCOMES (CO)

CO1: Design and implement lexical analyzer using LEX tool.
CO2: Apply context-free grammar and PDA design concepts to design parsers.
CO3: Design and implement Bottom-Up parser using YACC.
CO4: Create frameworks for syntax directed translation schemes, type checking and intermediate code generation.
CO5: Analyze various code optimization techniques and code generation.
COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

| COs | $\begin{gathered} \mathbf{P O} \\ 1 \end{gathered}$ | $\begin{gathered} \mathbf{P O} \\ 2 \end{gathered}$ | $\begin{gathered} \mathbf{P O} \\ \mathbf{3} \end{gathered}$ | $\begin{gathered} \text { PO } \\ 4 \end{gathered}$ | $\begin{gathered} \mathbf{P O} \\ 5 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 6 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 7 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 8 \end{gathered}$ | $\begin{gathered} \mathbf{P O} \\ 9 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 10 \end{gathered}$ | $\begin{gathered} \mathrm{PO} \\ 11 \end{gathered}$ | $\begin{gathered} \mathbf{P O} \\ 12 \end{gathered}$ | $\begin{gathered} \text { PSO } \\ 1 \end{gathered}$ | $\begin{gathered} \text { PSO } \\ 2 \end{gathered}$ | $\begin{gathered} \text { PSO } \\ \mathbf{3} \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| :--- | :--- | :--- | :--- | :--- | :--- |
| TLM2 | PPT | TLM5 | Programming | TLM8 | Lab Demo |
| TLM3 | Tutorial | TLM6 | Assignment or Quiz | TLM9 | Case Study |

EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
| :--- | :--- | :--- |
| Assignment/Quiz - 1 | 1 | $\mathrm{~A} 1=5$ |
| Assignment/Quiz - 2 | 2 | $\mathrm{~A} 2=5$ |
| I-Mid Examination | 1,2 | $\mathrm{~B} 1=20$ |
| Assignment/Quiz - 3 | 3 | $\mathrm{~A} 3=5$ |
| Assignment/Quiz - 4 | 4 | $\mathrm{~A} 4=5$ |
| Assignment/Quiz - 5 | 5 | A5=5 |
| II-Mid Examination | $3,4,5$ | $\mathrm{~B} 2=20$ |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | $1,2,3,4,5$ | $\mathrm{~A}=5$ |
| Evaluation of Mid Marks: B=75\% of Max(B1,B2)+25\% of Min(B1,B2) | $\mathbf{1 , 2 , 3 , 4 , 5}$ |  |
| Cumulative Internal Examination : A+B | $\mathbf{1 , 2 , 3 , 4 , 5}$ | B=20 |
| Semester End Examinations | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{1 0 0}$ |
| Total Marks: A+B+C |  |  |

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):
PEO I: To inculcate the adaptability skills into the students for software design, software development or any other allied fields of computing.

PEO II: To equip the graduates with the ability to analyze, design and synthesize data to create novel products.

PEO III: Ability to understand and analyze engineering issues in a broader perspective with ethical responsibility towards sustainable development.

PEO IV: To empower the student with the qualities of effective communication, team work, continues learning attitude, leadership needed for a successful computer professional.

## PROGRAMME OUTCOMES (POs):

## Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## PROGRAMME SPECIFIC OUTCOMES (PSOs):

## 1. Programming Paradigms:

To inculcate algorithmic thinking, formulation techniques and visualization, leading to problem solving skills using different programming paradigms.

## 2. Data Engineering:

To inculcate an ability to Analyze, Design and implement data driven applications into the students.

## 3. Software Engineering:

Develop an ability to implement various processes / methodologies /practices employed in design, validation, testing and maintenance of software products.

## COURSE HANDOUT

## PROGRAM

## ACADEMIC YEAR

: B.Tech., VI-Sem., CSE-‘A'
: 2017-18

COURSE NAME \& CODE : ARTIFICIAL INTELLIGENCE - S 137
L-T-P STRUCTURE : 3-1-0
COURSE CREDITS : 3
COURSE INSTRUCTOR : Dr. P. M. ASHOK KUMAR
COURSE COORDINATOR :

## PRE-REQUISITE: Discrete Mathematics, Design Analysis of Algorithms

## COURSE OBJECTIVE :

This course is used to solve various AI problems using various problem solving techniques and constraint satisfaction problems. This course gives better understanding of problem solving techniques like propositional and predicate logic, bayes theorem, fuzzy logic, Neural Network, game playing, expert systems, Robotics and swarm intelligence.

## COURSE OUTCOMES(CO)

CO1: Ability to understand AI problems and techniques of solving problems, agents and their types.
CO 2 : Ability to understand knowledge and its representation techniques, logic and algorithms implementation in different kinds of logic.
CO3: Students able to know uncertainty and certainty, factors and theories and appropriate examples.
CO4: Student can understand various planning techniques and learning techniques.
CO5: He can able to know various advanced topics like expert systems, robotics and swarm intelligent systems.

COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

## ACADEMIC CALENDAR:

| Description | From | To | Weeks |
| :--- | :---: | :--- | :---: |
| I Phase of Instructions-1 | $27-11-2017$ | $13-01-2018$ | 7 |
| I Mid Examinations | $16-01-2018$ | $20-01-2018$ | 1 |
| II Phase of Instructions | $22-01-2018$ | $31-03-2018$ | 7 |
| II Mid Examinations | $02-04-2018$ | $07-04-2018$ | 1 |
| Preparation and Practicals | $09-04-2018$ | $21-04-2018$ | 2 |
| Semester End Examinations | $23-04-2018$ | $05-05-2018$ | 2 |

## EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
| :--- | :--- | :--- |
| Assignment/Quiz - 1 | 1 | $\mathrm{~A} 1=5$ |
| Assignment/Quiz - 2 | 2 | A2=5 |
| I-Mid Examination | 1,2 | $\mathrm{~B} 1=20$ |
| Assignment/Quiz - 3 | 3 | A3=5 |
| Assignment/Quiz - 4 | 4 | A4=5 |
| Assignment/Quiz -5 | 5 | A5=5 |
| II-Mid Examination | $3,4,5$ | B2=20 |

| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | $1,2,3,4,5$ | $\mathrm{~A}=5$ |
| :--- | :--- | :--- |
| Evaluation of Mid Marks: B=75\% of Max(B1,B2)+25\% of $\operatorname{Min}(\mathrm{B} 1, \mathrm{~B} 2)$ | $1,2,3,4,5$ | $\mathrm{~B}=20$ |
| Cumulative Internal Examination : A+B | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{A + B = \mathbf { 2 5 }}$ |
| Semester End Examinations | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{C = 7 5}$ |
| Total Marks: A+B+C | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{1 0 0}$ |

## PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

PEO I: To inculcate the adaptability skills into the students for software design, software development or any other allied fields of computing.

PEO II: To equip the graduates with the ability to analyze, design and synthesize data to create novel products.

PEO III: Ability to understand and analyze engineering issues in a broader perspective with ethical responsibility towards sustainable development.
PEO IV: To empower the student with the qualities of effective communication, team work, continues learning attitude, leadership needed for a successful computer professional.

## PROGRAMME OUTCOMES (POs)

## Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess social, health, safety, legal and cultural issues and the consequent responsibilities
relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutions in social and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## Program Specific Outcomes:

## 1. Programming Paradigms:

To inculcate algorithmic thinking, formulation techniques and visualization, leading to problem solving skills using different programming paradigms.

## 2. Data Engineering:

To inculcate an ability to Analyze, Design and implement data driven applications into the students.

## 3. Software Engineering:

Develop an ability to implement various processes / methodologies /practices employed in design, validation, testing and maintenance of software products.

## COURSE HANDOUT

## PROGRAM <br> ACADEMIC YEAR <br> : B.Tech., VI-SEM,CSE <br> : 2017-18 <br> COURSE NAME \& CODE : DistributedOperating systems <br> L-T-P STRUCTURE : 3-1-0 <br> COURSE CREDITS : 3 <br> COURSE INSTRUCTOR : A.Praneetha <br> COURSE COORDINATOR :

Part-A

PRE-REQUISITE: Knowledge in operating system concepts.
COURSE EDUCATIONAL OBJECTIVES (CEOs) : This course provides a comprehensive introduction to understand the underlying principles, techniques and approaches which constitute a coherent body of knowledge in operating systems. In particular, the course will consider inherent functionality and processing of program execution. The emphasis of the course will be placed on understanding how the various elements that underlie operating system interact and provides services for execution of application software.

## COURSE OUTCOMES (COs)

After completion of the course, the student will be able to
CO1: Identify the hardware and software concepts to design the communication model in Distributed System.

CO2: Evaluate the implementation of process, thread, file systems and processors in Distributed system.

CO3: Analyze Clock Synchronization protocols in Distributed system as well as Deadlock handling mechanism.

C04: Compare Shared memory Multiprocessors used in Distributed System.
C05: Examine the case study of CHROUS, MACH distributed operating systems.

COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

| C0s | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | P07 | PO8 | PO9 | PO10 | PO11 | P012 | PSO1 | PSO2 | PSO3 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| C01 |  |  | 2 |  |  |  |  |  |  |  |  |  |  |  | 1 |
| C02 |  | 1 | 2 |  |  |  |  |  |  |  |  |  |  |  |  |
| C03 |  |  | 2 |  |  |  |  |  |  |  |  |  |  |  |  |

| Assignment/Quiz - 5 | 5 | $\mathrm{~A}=5$ |
| II-Mid Examination | $1,2,3,4,5$ | $\mathrm{~A}=5$ |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | $1,2,3,4,5$ | $\mathrm{~B}=20$ |
| Evaluation of Mid Marks: B=75\% of Max(B1,B2)+25\% of Min(B1,B2) | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{A + B = 2 5}$ |
| Cumulative Internal Examination : A+B | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{C = 7 5}$ |
| Semester End Examinations | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{1 0 0}$ |
| Total Marks: A+B+C |  |  |

## PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEO I: To inculcate the adaptability skills into the students for software design, software development or any other allied fields of computing.

PEO II: To equip the graduates with the ability to analyze, design and synthesize data to create novel products.
PEO III: Ability to understand and analyze engineering issues in a broader perspective with ethical responsibility towards sustainable development.

PEO IV: To empower the student with the qualities of effective communication, team work, continues learning attitude, leadership needed for a successful computer professional.

## PROGRAMME OUTCOMES (POs):

## Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering
fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## PROGRAMME SPECIFIC OUTCOMES (PSOs):

## 1. Programming Paradigms:

To inculcate algorithmic thinking, formulation techniques and visualization, leading to problem solving skills using different programming paradigms.

## 2. Data Engineering:

To inculcate an ability to Analyze, Design and implement data driven applications into the students.

## 3. Software Engineering:

Develop an ability to implement various processes / methodologies /practices employed in design, validation, testing and maintenance of software products.

## COURSE HANDOUT

## PROGRAM

ACADEMIC YEAR
: B.Tech., VI-Sem., CSE
: 2017-18

COURSE NAME \& CODE : Information Security - S272
L-T-P STRUCTURE : 3-1-0
COURSE CREDITS : 3
COURSE INSTRUCTOR : K SUNDEEP SARADHI
COURSE COORDINATOR : Dr. K.S.M.V.KUMAR
PRE-REQUISITE: Knowledge of security issues in using a network
COURSE OBJECTIVE : This course provides the knowledge to understand the basic concept of Cryptography and Network Security, types of ciphers and various symmetric and asymmetric algorithms. Also provides the knowledge on digital signatures, viruses, intruders and firewalls.

## COURSE OUTCOMES (COs)

CO1: Demonstrate the use of encryption algorithm for achieving data confidentiality

CO2: Apply Secure hash functions for attaining data integrity
CO3: Analyze the security mechanisms for acheiving authentication
CO4: Analyze the protocols for acheiving availability, access control to resources and protocols for non-repudiation

CO5: Explore the threats and remedial measures for system security

COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

# LAKIREDDY BALI REDDY COLLEGE OF ENGINEERING (A) 

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
(Autonomous \& Affiliated to JNTUK, Kakinada \& Approved by AICTE, New Delhi, NAAC Accredited with 'A' grade, Certified by ISO 9001:2015)
L B Reddy Nagar, Mylavaram-521 230, Krishna District, Andhra Pradesh.

## COURSE HANDOUT

## PROGRAM

ACADEMIC YEAR : 2017-18
COURSE NAME \& CODE : UML Design - S 415

## L-T-P STRUCTURE : 3-1-0

COURSE CREDITS : 3
COURSE INSTRUCTOR : Dr .O.Rama Devi
COURSE COORDINATOR : Dr. Ch. Venkata Narayana Reddy
PRE-REQUISITE: Knowledge of Object Oriented Methods

## COURSE OBJECTIVE:

The main objective of this course is that the students become familiar with all phases of OOAD and master the main features of the UML. They come to know about the main concepts of Object Technologies and how to apply them at work and develop the ability to analyze and solve challenging problem in various domains. And Learn the Object Design Principles and understand how to apply them towards implementation.

## COURSE OUTCOMES (CO):

CO1: Select the basic elements of modeling such as Things, Relationships and Diagrams depending on the views of UML Architecture and SDLC.
CO2: Apply basic and Advanced Structural Modeling Concepts for designing real time applications.
CO3: Design Class and Object Diagrams that represent Static Aspects of a Software System.
CO4: Analyze Dynamic Aspects of a Software System using Use Case, Interaction and Activity Diagrams.
CO5: Apply techniques of State Chart Diagrams and Implementation Diagrams to model behavioral aspects and Runtime environment of Software Systems

COURSE ARTICULATION MATRIX (Correlation between COs, POs \& PSOs):

## ACADEMIC CALENDAR:

| Description | From | To | Weeks |
| :--- | :---: | :---: | :---: |
| I Phase of Instructions | $27-11-2017$ | $13-01-2018$ | 7 W |
| Sankranthi Holidays | $14-01-2018$ | $15-01-2018$ | 2 Days |
| I Mid Examinations | $16-01-2018$ | $20-01-2018$ | 1 W |
| II Phase of Instructions | $22-01-2018$ | $31-03-2018$ | $9 \mathrm{~W}+(1 \mathrm{~W}$ CRT $)$ |
| II Mid Examinations | $02-04-2018$ | $07-04-2018$ | 1 W |
| Preparation and Practicals | $09-04-2018$ | $21-04-2018$ | 2 W |
| Semester End Examinations | $23-04-2018$ | $05-05-2018$ | 2 W |

## EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
| :--- | :--- | :--- |
| Assignment/Quiz - 1 | 1 | A1=5 |
| Assignment/Quiz - 2 | 2 | A2=5 |
| I-Mid Examination | 1,2 | B1=20 |
| Assignment/Quiz - 3 | 3 | A3=5 |
| Assignment/Quiz - 4 | 4 | A4=5 |
| Assignment/Quiz - 5 | 5 | A5=5 |
| II-Mid Examination | $3,4,5$ | B2=20 |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | $1,2,3,4,5$ | A=5 |
| Evaluation of Mid Marks: B=75\% of Max(B1,B2)+25\% of Min(B1,B2) | $1,2,3,4,5$ | $\mathrm{~B}=20$ |
| Cumulative Internal Examination : A+B | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{A + B = \mathbf { 2 5 }}$ |
| Semester End Examinations | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{C = 7 5}$ |
| Total Marks: A+B+C | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{1 0 0}$ |

# LAKIREDDY BALI REDDY COLLEGE OF ENGINEERING 

 DEPARTMENT OF COMPUTER SCIENCE \& ENGINEERING(Autonomous \& Affiliated to JNTUK, Kakinada \& Approved by AICTE, New Delhi, NAAC Accredited with 'A' grade, Certified by ISO 9001:2015)
L B Reddy Nagar, Mylavaram-521 230, Krishna District, Andhra Pradesh.
COURSE HANDOUT

| PROGRAM | $:$ B.Tech., VI-Sem., CSE - A |
| :--- | :--- |
| ACADEMIC YEAR | $: 2017-18$ |
| COURSE NAME \& CODE | $:$ WEB TECHNOLOGIES - S425 |

## L-T-P STRUCTURE : 3-1-0

COURSE CREDITS : 3
COURSE INSTRUCTOR : A. SUDHAKAR
COURSE COORDINATOR : A. SUDHAKAR
PRE-REQUISITE: C, C++, JAVA Languages
COURSE OBJECTIVE: On completion of this course, a student will be familiar with client server architecture and able to develop a web application using java technologies. Students will gain the skills and project-based experience needed for entry into web application and development careers

## COURSE OUTCOMES (CO)

CO1: Design web pages with HTML \& DHTML.
CO2: Apply basic concepts of XML, DOM \& SAX and Java Beans to solve real world problems.
CO3: Design dynamic web pages using server side component Servlets.
CO4: Create real world web applications using JSP.
CO5: Apply Swings \& Struts framework for application development.
COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

| COs | $\begin{array}{\|c} \hline \text { PO } \\ 1 \\ \hline \end{array}$ | $\begin{gathered} \text { PO } \\ 2 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 3 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 4 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 5 \\ \hline \end{gathered}$ | $\begin{array}{\|c} \hline \text { PO } \\ 6 \\ \hline \end{array}$ | $\begin{gathered} \text { PO } \\ 7 \\ \hline \end{gathered}$ | $\begin{gathered} \text { PO } \\ 8 \\ \hline \end{gathered}$ | $\begin{gathered} \text { PO } \\ 9 \end{gathered}$ | $\begin{aligned} & \hline \text { PO } \\ & 10 \\ & \hline \end{aligned}$ | $\begin{gathered} \hline \text { PO } \\ 11 \\ \hline \end{gathered}$ | $\begin{aligned} & \hline \text { PO } \\ & 12 \\ & \hline \end{aligned}$ | $\begin{gathered} \text { PSO } \\ 1 \\ \hline \end{gathered}$ | $\begin{gathered} \hline \text { PSO } \\ 2 \\ \hline \end{gathered}$ | $\begin{gathered} \hline \text { PSO } \\ \hline \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| C01 | 2 | 2 | 2 |  | 3 |  |  |  |  |  |  |  | 3 |  |  |
| $\mathrm{CO2}$ | 3 | 2 | 3 |  | 3 |  |  |  |  |  |  |  | 3 | 3 |  |
| CO 3 | 3 | 2 | 3 |  | 3 |  |  |  |  |  |  |  | 3 | 3 |  |
| CO4 | 3 | 2 | 3 |  | 3 |  |  |  |  |  |  |  | 3 | 3 |  |
| $\mathrm{CO5}$ | 3 | 2 | 3 |  | 3 |  |  |  |  |  |  |  | 3 | 3 |  |

Note: Enter Correlation Levels $\mathbf{1}$ or $\mathbf{2}$ or 3. If there is no correlation, put '-’
1- Slight (Low), 2 - Moderate (Medium), 3 - Substantial (High).

| TLM2 | PPT | TLM5 | Programming | TLM8 | Lab Demo |
| TLM3 | Tutorial | TLM6 | Assignment or Quiz | TLM9 | Case Study |

EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
| :--- | :--- | :--- |
| Assignment/Quiz - 1 | 1 | $\mathrm{~A} 1=5$ |
| Assignment/Quiz - 2 | 2 | $\mathrm{~A} 2=5$ |
| I-Mid Examination | 1,2 | $\mathrm{~B} 1=20$ |
| Assignment/Quiz - 3 | 3 | $\mathrm{~A} 3=5$ |
| Assignment/Quiz - 4 | 4 | $\mathrm{~A} 4=5$ |
| Assignment/Quiz - 5 | 5 | $\mathrm{~A}=4,5$ |
| II-Mid Examination | $1,2,3,4,5$ | $\mathrm{~A}=5$ |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | $1,2,3,4,5$ | $\mathrm{~B}=20$ |
| Evaluation of Mid Marks: B=75\% of Max(B1,B2)+25\% of Min(B1,B2) | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{A + B = 2 5}$ |
| Cumulative Internal Examination : A+B | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{C = 7 5}$ |
| Semester End Examinations | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{1 0 0}$ |
| Total Marks: A+B+C |  |  |

## PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEO I: To inculcate the adaptability skills into the students for software design, software development or any other allied fields of computing.
PEO II: To equip the graduates with the ability to analyze, design and synthesize data to create novel products.

PEO III: Ability to understand and analyze engineering issues in a broader perspective with ethical responsibility towards sustainable development.

PEO IV: To empower the student with the qualities of effective communication, team work, continues learning attitude, leadership needed for a successful computer professional.

## PROGRAMME OUTCOMES (POs):

## Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## PROGRAMME SPECIFIC OUTCOMES (PSOs):

## 1. Programming Paradigms:

To inculcate algorithmic thinking, formulation techniques and visualization, leading to problem solving skills using different programming paradigms.

## 2. Data Engineering:

To inculcate an ability to Analyze, Design and implement data driven applications into the students.

## 3. Software Engineering:

Develop an ability to implement various processes / methodologies /practices employed in design, validation, testing and maintenance of software products.

# LAKIREDDY BALI REDDY COLLEGE OF ENGINEERING DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING 

(Autonomous \& Affiliated to JNTUK, Kakinada \& Approved by AICTE, New Delhi,
NAAC Accredited with ' $A$ ' grade, Certified by ISO 9001:2015)
L B Reddy Nagar, Mylavaram-521 230, Krishna District, Andhra Pradesh.

## COURSE HANDOUT

## PROGRAM

ACADEMIC YEAR
COURSE NAME \& CODE
: B.Tech, VI-Sem., CSE
: 2017-18
: Compiler design - S163

L-T-P STRUCTURE : 3-1-0
COURSE CREDITS : 3
COURSE INSTRUCTOR : Mr. L V Krishna Rao
COURSE COORDINATOR : Dr. D. Veeraiah
PRE-REQUISITE: knowledge in Theory of Computation
COURSE OBJECTIVE: To introduce the major concept areas of language translation and compiler design and enrich the knowledge in various phases of compiler ant its use, code optimization techniques, machine code generation, and use of symbol table. To provide practical programming skills necessary for constructing a compiler.

## COURSE OUTCOMES (CO)

CO1: Design and implement lexical analyzer using LEX tool.
CO2: Apply context-free grammar and PDA design concepts to design parsers.
CO3: Design and implement Bottom-Up parser using YACC.
CO4: Create frameworks for syntax directed translation schemes, type checking and intermediate code generation.
CO5: Analyze various code optimization techniques and code generation.
COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

| COs | $\begin{gathered} \mathbf{P O} \\ 1 \end{gathered}$ | $\begin{gathered} \mathbf{P O} \\ 2 \end{gathered}$ | $\begin{gathered} \mathbf{P O} \\ \mathbf{3} \end{gathered}$ | $\begin{gathered} \text { PO } \\ 4 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 5 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 6 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 7 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 8 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 9 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 10 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 11 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 12 \end{gathered}$ | $\begin{gathered} \text { PSO } \\ 1 \end{gathered}$ | $\begin{gathered} \text { PSO } \\ 2 \end{gathered}$ | $\begin{gathered} \text { PSO } \\ \mathbf{3} \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| CO1 | 3 | 3 | - | 1 | - | - | - | - | - | - | - | - | 1 | - | - |
| CO2 | 3 | 3 | - | - | - | - | - | - | - | - | - | - | - | - | 1 |
| CO3 | 3 | 3 | - | 2 | - | - | - | - | - | - | - | - | - | - | 1 |
| CO4 | 3 | 3 | - | - | - | - | - | - | - | - | - | - | 1 | - | - |
| $\mathrm{CO5}$ | 3 | 3 | - | - | - | - | - | - | - | - | - | - | 2 | - | 1 |

Note: Enter Correlation Levels $\mathbf{1}$ or $\mathbf{2}$ or 3. If there is no correlation, put ' - ' 1-Slight (Low), 2 - Moderate (Medium), $\mathbf{3}$ - Substantial (High).

## BOS APPROVED TEXT BOOKS:

T1 Alfred V.Aho, Jeffrey D.Ullman, Ravi sethi "Compilers Principles, Techniques and Tools", Pearson Education, 2nd Edition, 2008.

| Assignment/Quiz - 5 | 5 | A5=5 |
| II-Mid Examination | $3,4,5$ | $\mathrm{~B} 2=20$ |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | $1,2,3,4,5$ | $\mathrm{~A}=5$ |
| Evaluation of Mid Marks: B=75\% of Max(B1,B2)+25\% of Min(B1,B2) | $1,2,3,4,5$ | $\mathrm{~B}=20$ |
| Cumulative Internal Examination : A+B | $\mathbf{1 , 2 , 3 , 4 , 5}$ | A+B=25 |
| Semester End Examinations | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{C = 7 5}$ |
| Total Marks: A+B+C | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{1 0 0}$ |

## PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEO I: To inculcate the adaptability skills into the students for software design, software development or any other allied fields of computing.

PEO II: To equip the graduates with the ability to analyze, design and synthesize data to create novel products.

PEO III: Ability to understand and analyze engineering issues in a broader perspective with ethical responsibility towards sustainable development.
PEO IV: To empower the student with the qualities of effective communication, team work, continues learning attitude, leadership needed for a successful computer professional.

## PROGRAMME OUTCOMES (POs):

## Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## PROGRAMME SPECIFIC OUTCOMES (PSOs):

## 1. Programming Paradigms:

To inculcate algorithmic thinking, formulation techniques and visualization, leading to problem solving skills using different programming paradigms.

## 2. Data Engineering:

To inculcate an ability to Analyze, Design and implement data driven applications into the students.

## 3. Software Engineering:

Develop an ability to implement various processes / methodologies /practices employed in design, validation, testing and maintenance of software products.

## COURSE HANDOUT

## PROGRAM <br> : B.Tech., VI-Sem., CSE <br> ACADEMIC YEAR <br> : 2017-18

COURSE NAME \& CODE : ARTIFICIAL INTELLIGENCE-S137
L-T-P STRUCTURE : 3-1-2
COURSE CREDITS : 3
COURSE INSTRUCTOR : Dr.K.Venkateswara Rao
COURSE COORDINATOR :
PRE-REQUISITE: Knowledge of neural networks.

## COURSE OBJECTIVE:

This course enables the students to know about
$\checkmark$ This gives a clear view of analyzing AI problems, types of problems, Techniques of solving problems.
$\checkmark$ It gives a clear view of knowledge, representation of knowledge, types of logic and its algorithms.
$\checkmark$ This course is used to provide the description of agents and various types of agents and how they used to solve various AI problems.
$\checkmark$ It provides a better understanding of uncertainty and certainty, its factors various theories of uncertainty and appropriate examples.
$\checkmark$ It provides a clear view of state space in search, game playing procedures, expert systems and advanced concepts like swarm intelligent systems.

## COURSE OUTCOMES (CO)

CO1: Understand about AI techniques and different ways to implement them and deals about the techniques and set of rules to find solutions in problem solving.
CO2: Implement and understand about various searching strategies, presenting various searching algorithms in searching techniques and also deals about problem solving techniques in search trees.
CO3: Understand about knowledge, represent different issues in knowledge, and present various ways to represent it, implement predicate and propositional knowledge and present logic resolution and unification techniques.
CO4: Present different types of knowledge and reasoning techniques, understand about logic programming and PROLOG, and implement indexing and matching techniques.
CO5: Present uncertainty in knowledge and various techniques to solve it. Present efficient techniques to remove uncertainty in knowledge domain.

COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

| COs | PO | PO | PO | PO | PO | PO | PO | PO | PO | PO | PO | PO | PSO | PSO | PSO |

| Cumulative Internal Examination : A+B | $1,2,3,4,5$ | $\mathrm{~A}+\mathrm{B}=25$ |
| Semester End Examinations | $1,2,3,4,5$ | $\mathrm{C}=75$ |
| Total Marks: A+B+C | $1,2,3,4,5$ | 100 |

## PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

PEO I: To inculcate the adaptability skills into the students for software design, software development or any other allied fields of computing.
PEO II: To equip the graduates with the ability to analyze, design and synthesize data to create novel products.
PEO III: Ability to understand and analyze engineering issues in a broader perspective with ethical responsibility towards sustainable development.
PEO IV: To empower the student with the qualities of effective communication, team work, continues learning attitude, leadership needed for a successful computer professional.

## PROGRAMME OUTCOMES (POs)

## Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineeringfundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complexengineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems anddesign system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and researchmethods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modernengineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assesssocietal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutionsin societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms ofthe engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader indiverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with
the engineeringcommunity and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of theengineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12.Life-long learning: Recognize the need for, and have the preparation and ability to engage inindependent and life-long learning in the broadest context of technological change.

## PSOs

## 1. Programming Paradigms:

To inculcate algorithmic thinking, formulation techniques and visualization, leading to problem solving skills using different programming paradigms.

## 2. Data Engineering:

To inculcate an ability to Analyse, Design and implement data driven applications into the students.

## 3. Software Engineering:

Develop an ability to implement various processes / methodologies /practices employed in design, validation, testing and maintenance of software products.

ACADEMIC YEAR : 2017-18
COURSE NAME & CODE : Distributed Operating System
L-T-P STRUCTURE : 3-1-2
COURSE CREDITS : 3
COURSE INSTRUCTOR : DIVVELA SRINIVASA RAO
COURSE COORDINATOR :
PRE-REQUISITE: Knowledge of Operating systems, Computer Networks.
COURSE OBJECTIVE:
```

This course enables the students to know about
A comprehensive introduction to understand the underlying principles, techniques and approaches which constitute a coherent body of knowledge in operating systems. In particular, the course will consider inherent functionality and processing of program execution. The emphasis of the course will be placed on understanding how the various elements that underlie operating system interact and provides services for execution of application software.

COURSE OUTCOMES (CO): At the end of the course, the student will be able to:

CO1: Identify the hardware and software concepts to design the communication model in Distributed System.

CO2: Evaluate the implementation of process, thread, file systems and processors in Distributed system.

CO3: Analyze Clock Synchronization protocols in Distributed system as well as Deadlock handling mechanism.

C04: Compare Shared memory Multiprocessors used in Distributed System.
CO5: Examine the case study of CHROUS, MACH distributed operating systems.

COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

| COs | PO <br> $\mathbf{1}$ | PO <br> $\mathbf{2}$ | PO <br> $\mathbf{3}$ | PO <br> $\mathbf{4}$ | PO <br> $\mathbf{5}$ | PO <br> $\mathbf{6}$ | PO <br> $\mathbf{7}$ | PO <br> $\mathbf{8}$ | PO <br> $\mathbf{9}$ | PO <br> $\mathbf{1 0}$ | PO <br> $\mathbf{1 1}$ | PO <br> $\mathbf{1 2}$ | PSO <br> $\mathbf{1}$ | PSO <br> $\mathbf{2}$ | PSO <br> $\mathbf{3}$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Assignment/Quiz -5 | 5 | $\mathrm{~A}=5$ |
| II-Mid Examination | $3,4,5$ | $\mathrm{~B} 2=20$ |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | $1,2,3,4,5$ | $\mathrm{~A}=5$ |
| Evaluation of Mid Marks: B=75\% of Max(B1,B2)+25\% of Min(B1,B2) | $1,2,3,4,5$ | $\mathrm{~B}=20$ |
| Cumulative Internal Examination : A+B | $1,2,3,4,5$ | $\mathrm{~A}+\mathrm{B}=25$ |
| Semester End Examinations | $1,2,3,4,5$ | $\mathrm{C}=75$ |
| Total Marks: A+B+C | $1,2,3,4,5$ | 100 |

## PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

PEO I: To inculcate the adaptability skills into the students for software design, software development or any other allied fields of computing.

PEO II: To equip the graduates with the ability to analyze, design and synthesize data to create novel products.

PEO III: Ability to understand and analyze engineering issues in a broader perspective with ethical responsibility towards sustainable development.

PEO IV: To empower the student with the qualities of effective communication, team work, continues learning attitude, leadership needed for a successful computer professional.

## PROGRAMME OUTCOMES (POs)

## Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess social, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutions in social and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognize the need for, and have the preparation and ability to
engage in independent and life-long learning in the broadest context of technological change.

## Program Specific Outcomes:

## 1. Programming Paradigms:

To inculcate algorithmic thinking, formulation techniques and visualization, leading to problem solving skills using different programming paradigms.

## 2. Data Engineering:

To inculcate an ability to Analyze, Design and implement data driven applications into the students.

## 3. Software Engineering:

Develop an ability to implement various processes / methodologies /practices employed in design, validation, testing and maintenance of software products.

## COURSE HANDOUT

PROGRAM
ACADEMIC YEAR
: B.Tech., VI-Sem., CSE
: 2017-18

COURSE NAME \& CODE : Information Security - S272
L-T-P STRUCTURE : 3-1-0
COURSE CREDITS : 3
COURSE INSTRUCTOR : Dr. K. S. M. V. Kumar
COURSE COORDINATOR : Dr. K. S. M. V. Kumar
PRE-REQUISITE: Knowledge of security issues in using a network
COURSE OBJECTIVE : This course provides the knowledge to understand the basic concept of Cryptography and Network Security, types of ciphers and various symmetric and assymmetric algorithms. Also provides the knowledge on digital signatures, viruses, intruders and firewalls.

## COURSE OUTCOMES (COs)

CO1: Demonstrate the use of encryption algorithm for acheiving data confidentiality

CO2: Apply Secure hash functions for attaining data integrity
CO3: Analyze the security mechanisms for acheiving authentication
CO4: Analyze the protocols for acheiving availability,access control to resources and protocols for non-repudiation

CO5: Explore the threats and remedial measures for system security

COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

| Preparation and Practicals | $09-04-2018$ | $21-04-2018$ | 2 |
| Semester End Examinations | $23-04-2018$ | $05-05-2018$ | 2 |

## EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
| :--- | :--- | :--- |
| Assignment/Quiz - 1 | 1 | $\mathrm{~A} 1=5$ |
| Assignment/Quiz - 2 | 2 | $\mathrm{~A} 2=5$ |
| I-Mid Examination | 1,2 | $\mathrm{~B} 1=20$ |
| Assignment/Quiz - 3 | 3 | $\mathrm{~A}=5$ |
| Assignment/Quiz - 4 | 4 | $\mathrm{~A} 4=5$ |
| Assignment/Quiz - 5 | 5 | $\mathrm{~A} 5=5$ |
| II-Mid Examination | $1,2,3,4,5$ | $\mathrm{~A}=5$ |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | $1,2,3,4,5$ | $\mathrm{~B}=20$ |
| Evaluation of Mid Marks: B=75\% of Max(B1,B2)+25\% of Min(B1,B2) | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{A + B = 2 5}$ |
| Cumulative Internal Examination : A+B | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{C = 7 5}$ |
| Semester End Examinations | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{1 0 0}$ |
| Total Marks: A+B+C |  |  |

# LAKIREDDY BALI REDDY COLLEGE OF ENGINEERING (A) 

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
(Autonomous \& Affiliated to JNTUK, Kakinada \& Approved by AICTE, New Delhi, NAAC Accredited with 'A' grade, Certified by ISO 9001:2015)
L B Reddy Nagar, Mylavaram-521 230, Krishna District, Andhra Pradesh.

## COURSE HANDOUT

## PROGRAM

ACADEMIC YEAR : 2017-18
COURSE NAME \& CODE : UML Design - S 415

## L-T-P STRUCTURE : 3-1-0

COURSE CREDITS : 3
COURSE INSTRUCTOR : Sk. Johny Basha
COURSE COORDINATOR : Dr. Ch. Venkata Narayana Reddy
PRE-REQUISITE: Knowledge of Object Oriented Methods

## COURSE OBJECTIVE:

The main objective of this course is that the students become familiar with all phases of OOAD and master the main features of the UML. They come to know about the main concepts of Object Technologies and how to apply them at work and develop the ability to analyze and solve challenging problem in various domains. And Learn the Object Design Principles and understand how to apply them towards implementation.

## COURSE OUTCOMES (CO):

CO1: Select the basic elements of modeling such as Things, Relationships and Diagrams depending on the views of UML Architecture and SDLC.
CO2: Apply basic and Advanced Structural Modeling Concepts for designing real time applications.
CO3: Design Class and Object Diagrams that represent Static Aspects of a Software System.
CO4: Analyze Dynamic Aspects of a Software System using Use Case, Interaction and Activity Diagrams.
CO5: Apply techniques of State Chart Diagrams and Implementation Diagrams to model behavioral aspects and Runtime environment of Software Systems

COURSE ARTICULATION MATRIX (Correlation between COs, POs \& PSOs):

| COs | PO | $\begin{gathered} \text { PO } \\ 2 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 3 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 4 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 5 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 6 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 7 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 8 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 9 \end{gathered}$ | $\begin{aligned} & \text { PO } \\ & 10 \end{aligned}$ | $\begin{gathered} \text { PO } \\ 11 \end{gathered}$ | $\begin{aligned} & \text { PO } \\ & 12 \end{aligned}$ | $\begin{gathered} \text { PSO } \\ 1 \end{gathered}$ | $\begin{gathered} \text { PSO } \\ 2 \end{gathered}$ | $\begin{gathered} \text { PSO } \\ 3 \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| CO1 | . | 1 | - | - | - | - | - | - | - | - | - | - | 1 | - | 3 |
| CO2 | - | - | 1 | - | - | - | - | - | - | - | - | - | 1 | - | 3 |
| CO3 | - | - | 2 | 1 | 2 | - | - | - | - | - | - | - | - | - | 3 |
| CO4 | - | - | 2 | 1 | 2 | - | - | - | - | - | - | - | - | - | 3 |
| C05 | - | - | 2 | 1 | 2 | - | - | - | - | - | - | - |  |  | 3 |

Note: 1- Slight (Low), 2-Moderate (Medium), 3-Substantial (High)

## BOS APPROVED TEXT BOOKS:

T1 Grady Booch, James Rumbaugh, Ivar Jacobson "The Unified Modeling Language User Guide, Pearson Education, $2^{\text {nd }}$ edition.
BOS APPROVED REFERENCE BOOKS:
R1 Meilir Page-Jones: Fundamentals of Object Oriented Design in UML, Pearson Education.
R2 Pascal Roques: Modeling Software Systems Using UML2, WILEY- Dreamtech India Pvt. Ltd.
R3 Atul Kahate: Object Oriented Analysis \& Design, TMH Companies.
R4 Craig Larman, Applying UML and Patterns: An introduction to Object Oriented Analysis and Design and Unified Process, Pearson Education.

COURSE DELIVERY PLAN (LESSON PLAN): Section-B UNIT - 1: INTRODUCTION TO UML

## PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEO I: To inculcate the adaptability skills into the students for software design, software development or any other allied fields of computing.
PEO II: To equip the graduates with the ability to analyze, design and synthesize data to create novel products.
PEO III: Ability to understand and analyze engineering issues in a broader perspective with ethical responsibility towards sustainable development.
PEO IV: To empower the student with the qualities of effective communication, team work, continues learning attitude, leadership needed for a successful computer professional.

## PROGRAMME OUTCOMES (POs):

## Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities
and norms of the engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## PROGRAMME SPECIFIC OUTCOMES (PSOs):

## 1. Programming Paradigms:

To inculcate algorithmic thinking, formulation techniques and visualization, leading to problem solving skills using different programming paradigms.

## 2. Data Engineering:

To inculcate an ability to Analyze, Design and implement data driven applications into the students.

## 3. Software Engineering:

Develop an ability to implement various processes / methodologies /practices employed in design, validation, testing and maintenance of software products.

# LAKIREDDY BALI REDDY COLLEGE OF ENGINEERING 

 DEPARTMENT OF COMPUTER SCIENCE \& ENGINEERING(Autonomous \& Affiliated to JNTUK, Kakinada \& Approved by AICTE, New Delhi, NAAC Accredited with 'A' grade, Certified by ISO 9001:2015)
L B Reddy Nagar, Mylavaram-521 230, Krishna District, Andhra Pradesh.
COURSE HANDOUT

PROGRAM : B.Tech., VI-Sem., CSE -B<br>ACADEMIC YEAR : 2017-18<br>COURSE NAME \& CODE : WEB TECHNOLOGIES - S425<br>L-T-P STRUCTURE : 3-1-0<br>COURSE CREDITS : 3<br>COURSE INSTRUCTOR : N. SRINIVASARAO<br>COURSE COORDINATOR : A. SUDHAKAR

PRE-REQUISITE: C, C++, JAVA Languages
COURSE OBJECTIVE: On completion of this course, a student will be familiar with client server architecture and able to develop a web application using java technologies. Students will gain the skills and project-based experience needed for entry into web application and development careers

## COURSE OUTCOMES (CO)

CO1: Design web pages with HTML \& DHTML.
CO2: Apply basic concepts of XML, DOM \& SAX and Java Beans to solve real world problems.
CO3: Design dynamic web pages using server side component Servlets.
CO4: Create real world web applications using JSP.
CO5: Apply Swings \& Struts framework for application development.
COURSE ARTICULATION MATRIX (Correlation between COs\&POs,PSOs):

| COs | $\begin{array}{\|c} \hline \text { PO } \\ 1 \\ \hline \end{array}$ | $\begin{gathered} \text { PO } \\ 2 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 3 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 4 \end{gathered}$ | $\begin{gathered} \text { PO } \\ 5 \\ \hline \end{gathered}$ | $\begin{array}{\|c} \hline \text { PO } \\ 6 \\ \hline \end{array}$ | $\begin{gathered} \text { PO } \\ 7 \\ \hline \end{gathered}$ | $\begin{gathered} \text { PO } \\ 8 \\ \hline \end{gathered}$ | $\begin{gathered} \text { PO } \\ 9 \end{gathered}$ | $\begin{aligned} & \hline \text { PO } \\ & 10 \\ & \hline \end{aligned}$ | $\begin{gathered} \hline \text { PO } \\ 11 \\ \hline \end{gathered}$ | $\begin{aligned} & \hline \text { PO } \\ & 12 \\ & \hline \end{aligned}$ | $\begin{gathered} \text { PSO } \\ 1 \\ \hline \end{gathered}$ | $\begin{gathered} \hline \text { PSO } \\ 2 \\ \hline \end{gathered}$ | $\begin{gathered} \hline \text { PSO } \\ \hline \end{gathered}$ |

| :--- | :--- | :--- | :--- | :--- | :--- |
| TLM2 | PPT | TLM5 | Programming | TLM8 | Lab Demo |
| TLM3 | Tutorial | TLM6 | Assignment or Quiz | TLM9 | Case Study |

EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
| :--- | :--- | :--- |
| Assignment/Quiz - 1 | 1 | $\mathrm{~A} 1=5$ |
| Assignment/Quiz - 2 | 2 | $\mathrm{~A} 2=5$ |
| I-Mid Examination | 1,2 | $\mathrm{~B} 1=20$ |
| Assignment/Quiz - 3 | 3 | $\mathrm{~A}=5$ |
| Assignment/Quiz - 4 | 4 | $\mathrm{~A} 4=5$ |
| Assignment/Quiz - 5 | 5 | $\mathrm{~A}=5$ |
| II-Mid Examination | $3,4,5$ | $\mathrm{~B} 2=20$ |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | $1,2,3,4,5$ | $\mathrm{~A}=5$ |
| Evaluation of Mid Marks: B=75\% of Max(B1,B2)+25\% of Min(B1,B2) | $1,2,3,4,5$ | $\mathrm{~B}=20$ |
| Cumulative Internal Examination : A+B | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{A + B = \mathbf { 2 5 }}$ |
| Semester End Examinations | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{C = 7 5}$ |
| Total Marks: A+B+C | $\mathbf{1 , 2 , 3 , 4 , 5}$ | $\mathbf{1 0 0}$ |

## PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEO I: To inculcate the adaptability skills into the students for software design, software development or any other allied fields of computing.

PEO II: To equip the graduates with the ability to analyze, design and synthesize data to create novel products.

PEO III: Ability to understand and analyze engineering issues in a broader perspective with ethical responsibility towards sustainable development.

PEO IV: To empower the student with the qualities of effective communication, team work, continues learning attitude, leadership needed for a successful computer professional.

## PROGRAMME OUTCOMES (POs):

## Engineering Graduates will be able to:

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. Conduct investigations of complex problems: Use research-based knowledge and
research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## PROGRAMME SPECIFIC OUTCOMES (PSOs):

## 1. Programming Paradigms:

To inculcate algorithmic thinking, formulation techniques and visualization, leading to problem solving skills using different programming paradigms.

## 2. Data Engineering:

To inculcate an ability to Analyze, Design and implement data driven applications into the students.

## 3. Software Engineering:

Develop an ability to implement various processes / methodologies /practices employed in design, validation, testing and maintenance of software products.
