<b>Date of Birth:</b> 05/08/1983	<b>Abstract:</b> In recent times the Geographical information systems (GIS) has plays a vital role in various engineering applications. GIS are provided with the hardware and software with newer, faster technological tools that define the state of the art. GIS can refer to a number of different technologies, processes, techniques and methods. It has many applications related to engineering, planning, management, transport/logistics, insurance, business. GIS are related information by using location as the key index variable. Locations or extents in the Earth space-time may be recorded as dates/times of occurrence, and x, y, and z coordinates representing, longitude, latitude, and elevation, respectively. GIS is also diverging into location based services, which allows GPS-enabled mobile devices to display their location in real time.	<b>UG Branch:</b> COMPUTER SCIENCE AND ENGINEERING	<b>Area of S</b>

<b>Objective:</b> 1.To train the faculty members towards the implementation aspects of GIS and its real-time applications which include data collections, filling the gaps in data collection such as mapping the demographic data, decision making for sustainable developments and automate the process. 2. To equip faculty with knowledge in GIS that brings the new direction learning curve to guide the students and finally confirm and verify that the information uploaded on the portal is correct to the best of our knowledge and belief. In case, at any point of time it is found that information provided in this proposal is false or incorrect, AICTE be at liberty to withdraw the grant given to us and we shall be liable to refund the entire amount of the grant with interest thereon and also liable for any or provide the AICTE may deem fit. We also understand that AICTE may not consider our future proposal in this circumstance.:	<b>Aadhaar Card (UID):</b> 943603699030	<b>Principal Phone:</b> 8333905791	<b>Principal</b> principal@
