Filing Date	:NA	<b>6) Mr. Ch. Sambasiva Rao</b>

(57) Abstract :

In one embodiment the present invention relates to a method to maintain records of the details of the donor like the amount of blood donated, blood group and locations. The present invention also relates to a method that link the donor with the Aadhar card number and stores the details of the donation in a database that helps him to reclaim the donated blood. Further the present invention relates to a method that connect all the blood banks and create a centralized system so that the donor collects the blood in any blood bank irrespective of the place of donation.
