C01	Construct mathematical arguments using logical connectives and quantifiers and verify them. (Apply- L3)
C02	Demonstrate the basic terminology of functions, relations, lattices and their operations. (Understand -L2)
C03	Illustrate the basic principles/techniques to solve different combinatorial problems and linear recurrence relations. (Apply- L3)
C04	Demonstrate the different types of graphs. (Understand -L2)
C05	Apply the properties of graphs to solve the graph theory problems in computer science. (Apply- L3)

COURSE EDUCATIONAL OBJECTIVES (CEOs):

- To help the students appreciate the essential complementary between 'VALUES' and 'SKILLS' to ensure sustained happiness and prosperity which are the core aspirations of all human beings.
- To facilitate the development of a Holistic perspective among students towards life and profession as well as towards happiness and prosperity based on a correct understanding of the Human reality and the rest of existence. Such holistic perspective forms the basis of Universal Human Values and movement towards value-based living in a natural way.
- To highlight plausible implications of such a Holistic understanding in terms of ethical human conduct, trustful and mutually fulfilling human behaviour and mutually enriching interaction with Nature.

COURSE OUTCOMES (COs): At the end of the course, student will be able to

C01	Describe the terms like Natural Acceptance, Happiness and Prosperity (L2)
