Objectives of FDP:

The objectives of the program are:

- To introduce faculty to emerging research areas in applied mathematics.
- To provide hands-on exposure to mathematical tools and computational techniques.
- To build capacity in mathematical thinking relevant to engineering and technology.

Outcomes of FDP:

- Enhanced understanding of recent research trends and applications of mathematics in science, engineering, and technology.
- Improved problem-solving skills through exposure to advanced mathematical concepts and computational tools.
- Strengthened ability to integrate mathematical methods into interdisciplinary research projects.
- Increased awareness of emerging areas such as mathematical modeling, data analytics, and optimization techniques.
- Development of collaborative networks among faculty members and researchers from various institutions.

Date: 28th July 2025:

Inaugural session on 28th July 2025 at 10:00 AM by **Dr. K. R. Kavitha**, one of the Co ordinator and Convener of FDP along with chief guest of the programme **Dr. D. K. K. Vamsi**, Associate Professor, Sri Sathya Sai Institute of Higher Learning Puttaparthi, Principal of LBRCE **Dr. K. Appa Rao**, and Vice Principal of LBRCE **Dr. B. Ramesh Reddy**.

Dr. K. R. Kavitha, has welcomed all the delegates and participants to the FDP. In her speech, she highlighted the main objectives and importance of this FDP. Along with this, she gave a brief introduction about the college, department and in particular Mathematics Division.

Day1:28th July 2025

Topic: Infectious Disease Modeling with Applications to Real World Problems

Resource Person: Dr. D. K. K. Vamsi, Associate Professor, Sri Sathya Sai Institute of Higher Learning, Puttaparthi.

Dr. K. K. Vamsi started his presentation on Introduction to Infectious Disease Modeling with Applications to Real World Problems. He explained to the students how mathematical models help us understand and predict the spread of infectious diseases. He introduced basic concepts like the SIR (Susceptible–Infected–Recovered) and SEIR models, explaining how they divide a population into different groups to study disease transmission. He discussed important parameters such as the basic reproduction number (R_0), transmission rate, and recovery rate, highlighting how these influence the growth or decline of an outbreak.

Using real-world examples like COVID-19, influenza, and vector-borne diseases such as dengue, he showed how models are applied for forecasting and policy-making. He also spoke about the challenges of working with real data, including underreporting and uncertainty, and how models can evaluate the effectiveness of interventions like vaccination, lockdowns, and social distancing. Finally, he encouraged students to see infectious disease modeling as a powerful tool that combines mathematics, public health, and real-world problem solving to guide better decisions during epidemics.

Dr. K. K. Vamsi,
Associate Professor,
Sri Satya Sai Institute of Higher
Learning, Puttaparthi.

Day2: 29th July 2025

Topic: Fuzzy logic control systems with incomplete information

Resource Person: Dr. V. Lakshmana Gomathi Nayagam, Professor, NIT, Trichy.

Dr. V. Lakshmana Gomathi Nayagam introduced the concept of fuzzy logic as a powerful tool for designing control systems that can operate effectively even when precise data is unavailable. He explained that, unlike traditional binary logic, fuzzy logic allows reasoning with degrees of truth, making it suitable for situations involving uncertainty, vagueness, or incomplete information.

The session covered the fundamentals of fuzzy sets, membership functions, and rule-based systems, highlighting how these concepts help in decision-making when inputs are imprecise. He discussed real-world applications such as temperature regulation, traffic control, and industrial automation, where sensor data may be noisy, missing, or partially known.

Dr. Nayagam also emphasized the design of fuzzy controllers that can adapt to incomplete datasets and still deliver stable, reliable performance. The talk encouraged students to view fuzzy logic as a bridge between human reasoning and machine computation, enabling intelligent systems to make sound decisions in uncertain environments.

Dr. V. Lakshmana Gomathi Nayagam, Professor, NIT Trichy

Fuzzy Logic

To overcome this difficulty, Lukasiewicz (1930) defined multi-valued logic with truth values

$$A = \{0, 1/n-1, 2/n-1, \dots, n-1/n-1\}.$$

According to him, we can give truth value lies in A

For the statement "I am a liar", since it is both true and false at the same time, the truth value or membership function of the statement is $1/2$.

Day3:30th July 2025

Topic: Integral equation techniques and boundary element method for wave-structure interaction problems

Resource Person: Dr. Santanu Koley, Associate Professor, BITS Pilani, Hyderabad.

Dr. Santanu Koley started his demonstration by giving today's topic: Integral equation techniques and boundary element method for wave-structure interaction problems. Dr. Santanu Koley discussed the use of integral equation techniques and the boundary element method (BEM) in solving complex wave-structure interaction problems. He explained that these methods are particularly effective for analyzing how waves—such as water waves or acoustic waves—interact with structures like offshore platforms, coastal defences, or marine vessels.

Unlike traditional domain-based numerical methods, BEM focuses only on the boundaries of the structure, reducing the computational effort while maintaining high accuracy. Dr. Koley described how integral equations are formulated to represent the physical problem and how they are solved to determine wave forces, motion responses, and energy dissipation. He highlighted real-world applications in ocean engineering, naval architecture, and coastal protection, emphasizing their importance in designing safe and efficient marine structures. The talk encouraged students to appreciate the combination of mathematical modelling, numerical methods, and engineering insight required to address practical challenges in wave-structure interactions.

Dr.Santanu Koley, Associate Professor,
BITS Pilani, Hyderabad.

The main window displays a presentation slide titled "Research Overview - Method Motivation" with the subtitle "Why Boundary Element Method???". The slide contains a hierarchical diagram: "Numerical Methods" at the top, branching into "Finite Difference Method", "Boundary Element Method", and "Finite Element Method". Below each method is a corresponding diagram: a grid for Finite Difference, a boundary mesh for Boundary Element, and a domain mesh for Finite Element. The Zoom interface includes a top toolbar with icons for chat, share, and other functions, and a right-hand panel showing a list of participants.

Day4: 31st July 2025

Topic: Stability of Autonomous and non-autonomous systems.

Resource Person : Dr. Ghosh Bapan, Associate Professor, IIT Indore.

Dr. Ghosh Bapan delivered an insightful session on the stability analysis of autonomous and non-autonomous systems, which are fundamental concepts in control theory and dynamical systems. He explained that **autonomous systems** have dynamics that do not explicitly depend on time, while **non-autonomous systems** involve time-dependent parameters or inputs.

The talk covered different notions of stability, including Lyapunov stability, asymptotic stability, and exponential stability, and how these concepts help predict the long-term behavior of systems. Dr. Bapan elaborated on analytical techniques such as Lyapunov's direct method and linearization for determining stability, supported by illustrative examples from engineering and physical systems.

Dr. Ghosh also discussed practical applications, including mechanical vibrations, electrical circuits, and robotic control, where ensuring stability is critical for performance and safety. The session emphasized the importance of stability analysis in designing reliable systems, bridging theoretical understanding with real-world problem-solving.

Dr. Bapan Ghosh, Associate Professor, IIT Indore.

The screenshot shows a presentation slide titled "Autonomous and non-autonomous equations". The slide content includes:

- We assume $t \geq 0$ for all analysis unless stated explicitly.
- Non-autonomous equation:**
$$\frac{dx(t)}{dt} = f(t, x(t)),$$

where time t is **explicitly present** in f .
Examples: (i) $\frac{dx(t)}{dt} = tx(t)$, (ii) $\frac{dx(t)}{dt} = \sin(t)$
- Autonomous equation:**
$$\frac{dx(t)}{dt} = f(x(t)).$$

Handwritten notes on the slide include $\frac{dx}{dt} = 0$ and $\frac{dx}{dt} = f(x)$.

Day5: 01st August 2025

Topic: Unlocking Cyber Security: An Algebraic and Number Theoretic Perspective.

Resource Person: Dr. Avishek Adhikari , Professor & HoD, Presidency University, Kolkata, West Bengal.

Dr. Avishek Adhikari delivered an engaging session on how algebra and number theory form the backbone of modern cyber security systems. He explained that concepts from pure mathematics, such as modular arithmetic, prime factorization, and finite fields, are at the heart of cryptographic algorithms used to secure digital communication. The talk introduced classical and modern encryption methods, including RSA, Diffie–Hellman key exchange, and elliptic curve cryptography, highlighting how their security relies on the computational difficulty of certain number theoretic problems.

Dr. Adhikari demonstrated how algebraic structures like groups, rings, and fields provide the mathematical framework for designing secure cryptographic protocols. He also discussed real-world applications in online banking, secure messaging, block chain, and digital signatures, emphasizing the importance of mathematical rigor in preventing cyber attacks. The session motivated students to appreciate the deep connection between abstract mathematics and practical cyber security, encouraging them to explore in disciplinary research in this area.

Valedictory Session

The Valedictory Function of the Faculty Development Program on “Contemporary Topics in Mathematics and its Applications”, organized by the Department of Mathematics, was held on 1st August 2025 at 12:30 PM.

The FDP, conducted from 28th July 2025 to 1st August 2025, aimed to provide faculty members with an in-depth understanding of recent developments in mathematics and its diverse applications across science and engineering domains. The program witnessed active participation from faculty members and research scholars from various institutions, who benefitted from expert lectures, interactive discussions, and problem-solving sessions.

The Valedictory Function was presided over by Dr. K. Appa Rao, Principal, who appreciated the efforts of the organizing committee and acknowledged the contribution of resource persons in making the FDP a success.

The Chief Guest, Dr. Avishek Adhikari, Professor & Head of the Department, Presidency University, Kolkata, addressed the gathering and emphasized the importance of mathematical thinking in research and innovation. He also encouraged participants to continue upgrading their skills and applying mathematical tools to solve real-world problems.

The function began with a warm welcome address, followed by a brief report on the FDP sessions, highlighting the topics covered and the positive response from participants. Selected participants shared their feedback, expressing their appreciation for the quality of sessions and the practical relevance of the topics discussed.

The event concluded with a Vote of Thanks proposed by Dr. K. Jhansi Rani, one of the Coordinators of the FDP, who expressed sincere gratitude to the management, Principal, Chief Guest, resource persons, participants, and all those who contributed to the smooth conduct of the program. The FDP and its Valedictory Function marked a fitting conclusion to an enriching week of academic learning and professional development.

Feedback Summary:

- Participants expressed that the FDP was very informative and the sessions were well-handled by the resource persons, though some felt the pace was a little fast.
- Many appreciated the clarity of explanations and real-life applications shared, which helped them understand mathematics beyond theory.
- Some participants suggested conducting the FDP in offline mode for better interaction and networking with experts.
- A few expressed that due to online mode there were technical issues and lack of facilities, and recommended organizing a conference in the future.
- Participants mentioned that more hands-on sessions using computational tools would enhance practical understanding.
- Several felt that the FDP motivated them towards research and provided good exposure to contemporary areas of mathematics.
- Some suggested increasing the duration of Q&A sessions to allow more interaction with the speakers.

ATR based on Feedback:

- Future FDPs will be designed with a slower pace of delivery, giving more time for discussion and Q&A sessions.
- The possibility of organizing upcoming FDPs and conferences in offline or hybrid mode will be explored to enable better interaction.
- Hands-on sessions using computational tools and software will be incorporated to enhance practical understanding.
- Applied examples and research-oriented lectures will be given more emphasis to motivate participants towards advanced research in mathematics.

The organizing committee assures that these suggestions will be implemented to improve the quality and effectiveness of future academic programs.

ABOUT THE INSTITUTION

Lakireddy Bali Reddy College of Engineering (LBRCE) is a reputed autonomous engineering institution located in Mylavaram, Andhra Pradesh. Established in 1998, the college is affiliated with Jawaharlal Nehru Technological University, Kakinada (JNTUK), and is approved by AICTE. It has earned accreditation from NAAC with an 'A' grade and seven programs are accredited by NBA. The college offers undergraduate (B. Tech.) programs in various branches like CSE, AI & ML, IT, ECE, EEE, Mechanical, Civil, and Aerospace Engineering, along with postgraduate courses including M. Tech. and MBA. Spread across a 75-acre lush green campus, LBRCE provides modern facilities such as advanced laboratories, a digital library, high-speed internet, separate hostels, a solar power system, sports facilities, and is recognized as a Scientific and Industrial Research Organization (SIRO) by the Government of India. Several research projects have been sanctioned by DST, UGC, and AICTE, Govt. of India amounting to Rs 10 Crores, besides 238 patents and 1150+ research publications. Also 4 depts. function as recognised Research Centres of JNTUK, Kakinada.

ABOUT THE DEPARTMENT

The Freshman Engineering Department (FED) comprises four core disciplines: Mathematics, Physics, Chemistry, English and Environmental Science. It is supported by a dedicated team of 46 faculty members, including 20 Ph.D. holders, while the remaining are actively pursuing their doctoral degrees. The department takes pride in its highly qualified, experienced, and self-motivated faculty who are deeply passionate about teaching and research. Faculty members are actively engaged in diverse research areas across science and engineering, resulting in over 160 publications in high-impact factor journals. The department is also proud to have secured funded projects, from the DST-Women Scientist scheme, Government of India, worth ₹62 lakhs. The department is equipped with state-of-the-art laboratories that offer both qualitative and quantitative experimental facilities.

Division of Mathematics – Freshman Engineering Department

The Division of Mathematics is a vital pillar of the Freshman Engineering Department, recognized for its academic excellence and vibrant research culture. The division comprises 14 dedicated faculty members, including 6 accomplished Ph.D. holders and 2 faculty members currently pursuing their doctoral studies. With over 100 research publications in reputed national and international journals, and the successful completion of a DST-sponsored research project, division reflects a strong commitment to scholarly contribution.

INTRODUCTION TO THE FDP

The Division of Mathematics, Freshman Engineering Department, is pleased to host a Five-Day online Faculty Development Program (FDP) on *Contemporary Topics in Mathematics and Its Applications*. In today's rapidly evolving academic and research landscape, mathematics serves as a foundational pillar for innovation across science, engineering, and technology. This FDP is designed to bring together faculty members, researchers, and academicians to engage with emerging trends, advanced methodologies, and real-world applications of mathematics.

The program offers a unique opportunity to delve into a range of specialized topics — from mathematical modeling of infectious diseases to cyber security frameworks grounded in algebra and number theory. By fostering a deeper understanding of both theoretical concepts and practical tools, the FDP aims to enhance the academic and research capabilities of participants, promote interdisciplinary collaborations, and contribute to the development of robust teaching-learning practices in higher education.

Objectives of the Program

- To introduce faculty to emerging research areas in applied mathematics.
- To provide hands-on exposure to mathematical tools and computational techniques.
- To build capacity in mathematical thinking relevant to engineering and technology.
- To promote interdisciplinary research and collaboration.

To

The Principal,
LBRCE.

Respected Sir,

Sub.: Request for Approval to Disburse Remuneration to Resource Person for Workshop – Reg.

We, the faculty from the Division of Mathematics, FED, are pleased to bring to your kind information that a five day online FDP entitled "Contemporary Topics in Mathematics and its Applications" was conducted from 28th July to 1st August 2025. We request you to sanction an amount of Rs. 17,000/- towards honorarium for the following Resource Persons as per the account details given below.

Resource Person	Date & Session	Title of the Talk	Account Number & IFSC	Bank Address	Honorarium in Rs.
Dr. Krishna Kiran Vamsi Dasu Coordinator, Centre of Excellence in Mathematical Biology, Sri Sathya Sai Institute of Higher Learning	28-07-2025 & 10 AM to 12 Noon	Infectious Disease Modeling with Applications to Real World Problems.	10678140635 & SBIN0002786	SBI, Puttaparthi Main branch	4,000/-
Prof. Lakshmana Gomathi Nayagam V Professor, Department of Mathematics, NIT, Trichy, T.N.	29-07-2025 & 10:00 AM to 12 Noon	Fuzzy Logic control systems with incomplete information	30056396979 & SBIN0001617	SBI, NIT, Trichy	3,000/-
Prof. Santanu Koley Associate Professor, Department of Mathematics, Birla Institute of Technology and Science - Pilani, Hyderabad Campus, Telangana	30-07-2025 & 10:00 AM to 12 Noon	Integral equation techniques and boundary element method for wave-structure interaction problems	37933663249 & SBIN0021092	SBI, Jawahar Nagar, BITS Campus	3,000/-
