

Alumni Feedback on Curriculum Development for the Academic Year 2021-22

Our Alumni feedback is valuable for us as it provides us with the inputs regarding improvement in curriculum development of our students. The overall feedback is summarized into five major key points and analysis of Alumni's feedback on the curriculum is presented below

Academic Year	Consolidated Alumni Feedback Report on Curriculum Development	Action Taken
2021-22	The need of habituating tool-based knowledge in various domain areas of Computer Science is much needed.	Suggested for next curriculum revision
	Introduce Cyber Security course as Core.	Considered and will be incorporated in Next curriculum revision
	Syllabus should be framed with GATE Orientation.	Syllabus of all the core and professional elective courses is reviewed and revised in line with the requirements of competitive examinations
	Reinforcement Learning Course should be introduced for projects in final years.	Suggested for next curriculum revision
	Big Data course should contain detailed topics on Hadoop concepts and optimization techniques.	Suggested for next curriculum revision
	Suggested to give importance on core Mathematics used in Data Science Course	Considered and will be incorporated in next curriculum revision
	For modern hacking projects alumni recommended to introduce the subjects related the security management.	May be considered and will be suggested for next curriculum revision.
	Open elective courses through various online platforms helps the students to spend good time for their concepts.	Open electives offering through online platforms like NPTEL

Faculty Feedback on Curriculum Development for the Academic Year 2021-22

Our faculty feedback is valuable for us as it provides us the inputs regarding improvement in curriculum development of our students. The overall feedback is summarized into five major key points and analysis of Faculty feedback on the curriculum is presented below

Academic Year	Consolidated Faculty Feedback Report on Curriculum Development	Action Taken
2021-22	Suggested to include cloud computing techniques, data science, A.I., ML, and Deep Learning	Considered and may be incorporated in Next Curriculum Revision.
	Suggested to include Computer vision in view with Perception Language Technologies and Intelligent Autonomous Systems	Suggested for next curriculum revision
	Dr. Pradip Kr. Das, Professor, Department of CSE, Indian Institute of Technology Guwahati appreciated the curriculum design of AI & ML courses are good and in current form to industrial needs. And suggested to include robotics process automation courses in specializations for Honors degree students.	Suggested for next curriculum revision
	Dr. E. Srinivasa Reddy Professor, Department of CSE, ANU, Guntur suggested to introduction to block chain & crypto currencies course syllabus revision recommended as per the industrial requirement	Suggested for next curriculum revision
	Mr. Sadu Chiranjeevi, Assistant Professor, IIIT, Nuzvid, India appreciated the syllabus and suggested the following to improve the curriculum suggested some embedded programming is required or robotics or automation required in ML, AI.	Suggested for next curriculum revision
	Associative Classification and its performance analysis concept recommended to add in the Data ware housing and mining course.	Suggested for next curriculum revision
	Dr. M. Babu Reddy , Principal, College of Engineering and Technology, Krishna University suggested to include Cross platform development frameworks and Mern stack web development as skill development courses	Suggested for next curriculum revision

Industry Feedback on Curriculum Development for the Academic Year 2021-22

We have designed general feedback form for the industry which include two parameters about the curriculum designed by LBRCE. The analysis of industry Feedback on the curriculum is presented below

Academic Year	Consolidated Industry Feedback Report on Curriculum Development	Action Taken
2021-22	Training on Coding skills to be planned for Advanced learners	Training on Coding skills to be planned throughout the semester as a part of the curriculum.
	Suggested to include Object Oriented Programming and Enterprise Programming	Suggested for Next Curriculum Revision
	Mr.L.Rama Lakshmi, IBM suggested "Google App Engine"	Suggested for Next Curriculum Revision
	The syllabus to be expanded with topics such as model based engineering including modelling and simulation.	Partially Considered
	Suggested to include Computer-Oriented Statistical Methods	Suggested for Next Curriculum Revision

Parents Feedback on Curriculum Development for the Academic Year 2021-2022

We have designed general feedback form for the parents which include two parameters about the curriculum designed by LBRCE. The analysis of Parents Feedback on the curriculum is presented below

Academic Year	Consolidated Parents Feedback Report on Curriculum Development	Action Taken
2021-22	Suggested more focus to include advanced courses like Artificial Intelligence, cybersecurity & physical systems, and ML courses with more practical exposer in B. Tech Curriculum	BoS committee has considered the feedback given by parents and approved the same for adding the number of professional elective courses and approved the same
	Counselling activities (Weekly once need update about students)	Informed to Counselling mentor to take necessary actions.
	Suggested to conduct more workshops and allow students for more industrial or field visits	Suggested for next curriculum revision
	Very good infrastructure in labs but no practical seriousness in guiding the students towards subject knowledge	Course Coordinators are instructed to conduct laboratories effectively.

Students Feedback on Curriculum Development for the Academic Year 2021-22

We are collecting feedback from our students personally. We have designed a special feedback form on curriculum development. The overall feedback is summarized into five major key points and analysis of student's feedback on the curriculum is presented below

Academic Year	Consolidated Students Feedback Report on Curriculum Development	Action Taken
2021-22	Suggested to give importance on core Data science courses and AI courses	May be considered for Next Curriculum Revision in program electives
	Suggested to implement "Industrial Visit" program	May be considered for Next Curriculum Revision
	Suggested to introduce Mobile Application Development	May be considered for Next Curriculum Revision
	Introduce the courses like App Development, Web Development for students	May be considered for Next Curriculum Revision
	Pipelining concept can be added in Operating Systems	May be considered
	Requested Introduce Mathematical Programming Course.	May be considered
	Requested to include AWS in Cloud Computing Course	May be considered for Next Curriculum Revision
	Better to implement subjects like artificial intelligence, machine learning, block chain	May be considered for Next Curriculum Revision
