DEPARTMENT OF INFORMATION TECHNOLOGY

COURSE HANDOUT

PART-A

Name of Course Instructor : Dr. B. Rama Devi

Course Name & Code : Artificial Intelligence & 17CI23

L-T-P Structure : 3-0-0 Credits : 3

Program/Sem/Sec : B.Tech., IT., V-Sem., Sections- A : 2021-22.

PRE-REQUISITE: Basic Mathematical Knowledge.

COURSE EDUCATIONAL OBJECTIVES (CEOs): This course is used to provide the description of agents and various types of agents and how they used to solve various AI problems. This gives a clear view of analyzing AI problems, types of problems techniques of solving problems. It gives a clear view of knowledge, representation of knowledge, types of logic and its algorithms. It provides a better understanding of uncertainty and certainty, its factors various theories of uncertainty and appropriate examples. It provides a clear view of state space in search, game playing procedures, expert systems and advanced concepts like swarm intelligent systems.

COURSE OUTCOMES (COs): At the end of the course, students are able to

| CO1 | Analyze the design specifications for the structure of agents and distinguish among |
|-----|--|
| | heuristic techniques |
| CO2 | Identify approaches and issues in knowledge representation and formulate Propositional |
| | and predicate logic |
| CO3 | Formulate the logic of non-monotonic reasoning and apply the techniques in |
| | Uncertainty domain |
| CO4 | Analyze the planning and learning techniques in state space search. |
| CO5 | Formulate the design specification of game playing techniques, analyze expert systems, |
| | robotics and swarm intelligence systems. |

COURSE ARTICULATION MATRIX (Correlation between COs, POs & PSOs):

| COs | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 | PSO3 |

| Cumulative Internal Examination (CIE) : A+B+M+Q | 40 |
| Semester End Examination (SEE) | 60 |
| Total Marks = CIE + SEE | 100 |

PART-D

PROGRAMME OUTCOMES (POs):

| PO 1 | Engineering knowledge: Apply the knowledge of mathematics, science, engineering |
|-------|--|
| | fundamentals, and an engineering specialization to the solution of complex engineering |
| | problems. |
| PO 2 | Problem analysis: Identify, formulate, review research literature, and analyze complex |
| | engineering problems reaching substantiated conclusions using first principles of mathematics, |
| | natural sciences, and engineering sciences. |
| PO 3 | Design/development of solutions: Design solutions for complex engineering problems and |
| | design system components or processes that meet the specified needs with appropriate |
| | consideration for the public health and safety, and the cultural, societal, and environmental |
| | considerations. |
| PO 4 | Conduct investigations of complex problems: Use research-based knowledge and research |
| | methods including design of experiments, analysis and interpretation of data, and synthesis of |
| DO - | the information to provide valid conclusions. |
| PO 5 | Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern |
| | engineering and IT tools including prediction and modeling to complex engineering activities |
| PO 6 | with an understanding of the limitations The engineer and society: Apply reasoning informed by the contextual knowledge to assess |
| POO | societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to |
| | the professional engineering practice |
| PO 7 | Environment and sustainability : Understand the impact of the professional engineering |
| 10, | solutions in societal and environmental contexts, and demonstrate the knowledge of, and need |
| | for sustainable development. |
| PO 8 | Ethics: Apply ethical principles and commit to professional ethics and responsibilities and |
| | norms of the engineering practice. |
| PO 9 | Individual and team work: Function effectively as an individual, and as a member or leader in |
| | diverse teams, and in multidisciplinary settings. |
| PO 10 | Communication: Communicate effectively on complex engineering activities with the |
| | engineering community and with society at large, such as, being able to comprehend and write |
| | effective reports and design documentation, make effective presentations, and give and receive |
| | clear instructions. |
| PO 11 | Project management and finance: Demonstrate knowledge and understanding of the |
| | engineering and management principles and apply these to one's own work, as a member and |
| DO 12 | leader in a team, to manage projects and in multidisciplinary environments. |
| PO 12 | Life-long learning: Recognize the need for, and have the preparation and ability to engage in |
| | independent and life-long learning in the broadest context of technological change. |

PROGRAMME SPECIFIC OUTCOMES (PSOs):

| P | SO 1 | Organize, Analyze and Interpret the data to extract meaningful conclusions. |
|---|-------------|---|
| P | SO 2 | Design, Implement and Evaluate a computer-based system to meet desired needs. |
| P | SO 3 | Develop IT application services with the help of different current engineering tools. |

| II-Mid Examination (Units-III, IV & V) | M2=20 |
| II-Quiz Examination (Units-III, IV & V) | Q2=10 |
| Attendance | B=5 |
| Assignment Marks = Best Four Average of A1, A2, A3, A4, A5 | A=5 |
| Mid Marks =75% of Max(M1,M2)+25% of Min(M1,M2) | M=20 |
| Quiz Marks =75% of Max(Q1,Q2)+25% of Min(Q1,Q2) | B=10 |
| Cumulative Internal Examination (CIE): A+B+M+Q | 40 |
| Semester End Examination (SEE) | 60 |
| Total Marks = CIE + SEE | 100 |

PART-D

PROGRAMME OUTCOMES (POs):

| PO 1 | Engineering knowledge: Apply the knowledge of mathematics, science, engineering |
|-------|---|
| | fundamentals, and an engineering specialization to the solution of complex engineering |
| | problems. |
| PO 2 | Problem analysis: Identify, formulate, review research literature, and analyze complex |
| | engineering problems reaching substantiated conclusions using first principles of mathematics, |
| | natural sciences, and engineering sciences. |
| PO 3 | Design/development of solutions: Design solutions for complex engineering problems and |
| | design system components or processes that meet the specified needs with appropriate |
| | consideration for the public health and safety, and the cultural, societal, and environmental |
| | considerations. |
| PO 4 | Conduct investigations of complex problems: Use research-based knowledge and research |
| | methods including design of experiments, analysis and interpretation of data, and synthesis of |
| PO 5 | the information to provide valid conclusions. |
| PU 5 | Modern tool usage : Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities |
| | with an understanding of the limitations |
| PO 6 | The engineer and society: Apply reasoning informed by the contextual knowledge to assess |
| 100 | societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to |
| | the professional engineering practice |
| PO 7 | Environment and sustainability : Understand the impact of the professional engineering |
| | solutions in societal and environmental contexts, and demonstrate the knowledge of, and need |
| | for sustainable development. |
| PO 8 | Ethics: Apply ethical principles and commit to professional ethics and responsibilities and |
| | norms of the engineering practice. |
| PO 9 | Individual and team work : Function effectively as an individual, and as a member or leader in |
| | diverse teams, and in multidisciplinary settings. |
| PO 10 | Communication: Communicate effectively on complex engineering activities with the |
| | engineering community and with society at large, such as, being able to comprehend and write |
| | effective reports and design documentation, make effective presentations, and give and receive |
| 50.44 | clear instructions. |
| PO 11 | Project management and finance: Demonstrate knowledge and understanding of the |
| | engineering and management principles and apply these to one's own work, as a member and |
| DO 12 | leader in a team, to manage projects and in multidisciplinary environments. |
| PO 12 | Life-long learning : Recognize the need for, and have the preparation and ability to engage in independent and life long learning in the broadest context of technological change. |
| | independent and life-long learning in the broadest context of technological change. |

PROGRAMME SPECIFIC OUTCOMES (PSOs):

| PSO 1 | Organize, Analyze and Interpret the data to extract meaningful conclusions. |
|-------|---|
| PSO 2 | Design, Implement and Evaluate a computer-based system to meet desired needs. |
| PSO 3 | Develop IT application services with the help of different current engineering tools. |

LAKIREDDY BALI REDDY COLLEGE OF ENGINEERING

(AUTONOMOUS)

Accredited by NAAC & NBA (CSE, IT, ECE, EEE & ME)

Approved by AICTE, New Delhi and Affiliated to JNTUK, Kakinada

L.B.Reddy Nagar, Mylavaram-521230, Krishna Dist, Andhra Pradesh, India

DEPARTMENT OF INFORMATION TECHNOLOGY

COURSE HANDOUT

PROGRAM : B.Tech., V-Sem., IT, R17Regulations

ACADEMICYEAR : 2021-2022

COURSE NAME & CODE : **SOFTWARE ENGINEERING**– 17CI10

L-T-PSTRUCTURE : 3-0-0

COURSECREDITS : 3

COURSEINSTRUCTOR : Mrs.S.Jyothi, Asst.Professor

PRE-REQUISITE : Concepts of Programming and Database Management Systems.

COURSE OBJECTIVE:

An understanding of different software processes and how to choose between them, How to understand requirements from a client and specify them Design in the large, including principled choice of software architecture, the use of modules and interfaces to enable separate development, and design patterns. Knowing various quality assurance techniques, including unit testing, integration testing and functional testing

COURSE OUTCOMES (CO): At the end of the course, the student will be able to

CO1: Outline basic proofs for theorems using the techniques of direct proofs, example, Proof by contradiction and mathematical induction.

CO2: Illustrate by examples the basic terminology of functions, relations, sets and Demonstrate knowledge of their associated operations.

CO3: Designing Network application, data structures using Graph terminology...

CO4: Apply the graph algorithms for routing and scheduling in different operating systems.

CO5: Construct compilers, error detection code, solve practical applications with the use of basic Counting principles of permutations, combinations, inclusion/exclusion principle and the Pigeon hole methodology.

COURSE ARTICULATION MATRIX (Correlation between COs & POs, PSOs):

| Description | From | То | Weeks |
|-----------------------------|------------|------------|-------|
| I Phase of Instructions-1 | 20-09-2021 | 06-11-2021 | 7W |
| I Mid Examinations | 08-11-2021 | 13-11-2021 | 1W |
| II Phase of Instructions | 15-11-2021 | 15-01-2022 | 9W |
| II Mid Examinations | 17-01-2021 | 22-01-2022 | 1W |
| Preparation and Practical's | 24-01-2022 | 29-01-2022 | 1W |
| Semester End Examinations | 31-01-2022 | 12-02-2022 | 2W |

EVALUATION PROCESS:

| Evaluation Task | Cos | Marks |
|--|-----------|------------|
| Assignment/ Quiz – 1 | 1 | A1=5 |
| Assignment/ Quiz – 2 | 2 | A2=5 |
| I-Mid Examination | 1,2 | B1=20 |
| Online Quiz-1 | 1,2 | C1=10 |
| Assignment/Quiz – 3 | 3 | A3=5 |
| Assignment/Quiz – 4 | 4 | A4=5 |
| Assignment/Quiz – 5 | 5 | A5=5 |
| II-Mid Examination | 3,4,5 | B2=20 |
| Online Quiz-2 | 3,4,5 | C2=10 |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | 1,2,3,4,5 | A=5 |
| Evaluation of Mid Marks: B=75% of Max(B1,B2)+25% of Min(B1,B2) | 1,2,3,4,5 | B=20 |
| Evaluation of Mid Marks: C=75% of Max(C1,C2)+25% of Min(C1,C2) | 1,2,3,4,5 | C=10 |
| Attendance | | D=5 |
| Cumulative Internal Examination : A+B+C+D | 1,2,3,4,5 | A+B+C+D=40 |
| Semester End Examinations | 1,2,3,4,5 | E=60 |
| Total Marks: A+B+C+D+E | 1,2,3,4,5 | 100 |

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

| PEO1: | Pursue a successful career in the area of Information Technology or its allied fields. |
|-------|--|
| PEO2: | Exhibit sound knowledge in the fundamentals of Information Technology and apply practical experience with programming techniques to solve real world problems. |
| PEO3: | Able to demonstrate self-learning, life-long learning and work in teams on multidisciplinary projects. |
| PEO4: | Able to understand the professional code of ethics and demonstrate ethical behavior, effective communication, team work and leadership skills in their job. |

PROGRAMME OUTCOMES (POs)

| PO1 | Engineering knowledge : Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. |
|------|---|
| PO2 | Problem analysis : Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. |
| PO3 | Design/development of solutions : Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations. |
| PO4 | Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. |
| PO5 | Modern tool usage : Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations. |
| PO6 | The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice. |
| PO7 | Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. |
| PO8 | Ethics : Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice. |
| PO9 | Individual and team work : Function effectively as an individual, and as a member or Leader in diverse teams, and in multidisciplinary settings. |
| PO10 | Communication : Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |
| PO11 | Project management and finance : Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments |
| PO12 | 12. Life-long learning : Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. |

PROGRAMME SPECIFIC OUTCOMES (PSOs)

Graduate of the Information Technology will have the ability to

| PSO1 | Organize, Analyze and Interpret the data to extract meaningful conclusions. |
|------|---|
| PSO2 | Design, Implement and Evaluate a computer-based system to meet desired needs. |
| PSO3 | Develop IT application services with the help of different current engineering tools. |

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

| PEO1: | Pursue a successful career in the area of Information Technology or its allied fields. |
|-------|--|
| PEO2: | Exhibit sound knowledge in the fundamentals of Information Technology and apply practical experience with programming techniques to solve real world problems. |
| PEO3: | Able to demonstrate self-learning, life-long learning and work in teams on multidisciplinary projects. |
| PEO4: | Able to understand the professional code of ethics and demonstrate ethical behavior, effective communication, team work and leadership skills in their job. |

PROGRAMME OUTCOMES (POs)

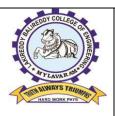

| PO1 | Engineering knowledge : Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. |
|------|---|
| PO2 | Problem analysis : Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. |
| PO3 | Design/development of solutions : Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations. |
| PO4 | Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. |
| PO5 | Modern tool usage : Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations. |
| PO6 | The engineer and society : Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice. |
| PO7 | Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. |
| PO8 | Ethics : Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice. |
| PO9 | Individual and team work : Function effectively as an individual, and as a member or Leader in diverse teams, and in multidisciplinary settings. |
| PO10 | Communication : Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |
| PO11 | Project management and finance : Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments |
| PO12 | 12. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. |

PROGRAMME SPECIFIC OUTCOMES (PSOs)

Graduate of the Information Technology will have the ability to

| PSO1 | Organize, Analyze and Interpret the data to extract meaningful conclusions. |
|------|---|
| PSO2 | Design, Implement and Evaluate a computer-based system to meet desired needs. |
| PSO3 | Develop IT application services with the help of different current engineering tools. |

DEPARTMENT OF INFORMATION TECHNOLOGY

COURSE HANDOUT

PROGRAM : B.Tech. V-Sem, IT, R17 Regulations

ACADEMIC YEAR : 2021-22

COURSE NAME & CODE: DESIGN AND ANALYSIS OF ALGORITHMS & S181

L-T-P STRUCTURE : 3-1-0

COURSE CREDITS : 3

COURSE INSTRUCTOR: A. SARVANI

PRE-REQUISITE : Knowledge of Programming, Discrete Mathematics and Data

Structures

COURSE OBJECTIVE:

Students undergoing this course are expected to identify the fundamental concepts of various algorithm design techniques. Make the students familiar to conduct performance evaluation of algorithms. Expertise the students with the various existing algorithm design techniques. Motivate the students to design new algorithms for various problems.

COURSE OUTCOMES (CO)

CO1: Identify the basic properties and analysis methods of algorithms and design conquer paradigm for solving a few example problems and analyze them.

CO2: Design Greedy algorithms for knapsack problem, minimum cost spanning tree, single source shortest path problem and analyze them.

CO3: Apply dynamic programming paradigm to solve travelling sales person problem,0/1 knapsack problem,Optimal binary search tree.

CO4: Apply Backtracking search methods on state space trees for few example problems.

CO5: Analyse branch and Bound search methods through problems such as 0/1 knapsack problem, Travelling sales personn problem.

COURSE ARTICULATION MATRIX (Correlation between Cos & POs, PSOs):

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEO I: Pursue a successful career in the area of Information Technology or its allied fields.

PEO II: Exhibit sound knowledge in the fundamentals of Information Technology and apply practical experience with programming techniques to solve real world problems.

PEO III: Able to demonstrate self-learning, life-long learning and work in teams on multidisciplinary projects.

PEO IV: Able to understand the professional code of ethics and demonstrate ethical behavior, effective communication, team work and leadership skills in their job.

PROGRAMME OUTCOMES (POs):

Engineering Graduates will be able to:

- 1. **Engineering knowledge**: Apply the knowledge of mathematics, science, engineeringfundamentals, and an engineering specialization to the solution of complex engineering problems.
- 2. **Problem analysis**: Identify, formulate, review research literature, and analyze complexengineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3. **Design/development of solutions**: Design solutions for complex engineering problems anddesign system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems: Use research-based knowledge and researchmethods including
 design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid
 conclusions.
- 5. **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modernengineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- 6. **The engineer and society**: Apply reasoning informed by the contextual knowledge to assessocietal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- 7. **Environment and sustainability**: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- 8. **Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- 9. **Individual and team work**: Function effectively as an individual, and as a member or leader indiverse teams, and in multidisciplinary settings.
- 10. **Communication**: Communicate effectively on complex engineering activities with the engineeringcommunity and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- 11. **Project management and finance**: Demonstrate knowledge and understanding of theenginee**ring and management principles and apply these to one's own work, as a member and** leader in a team, to manage projects and in multidisciplinary environments.
- 12. **Life-long learning**: Recognize the need for, and have the preparation and ability to engage inindependent and life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOMES (PSOs):

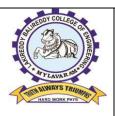

- 1. Organize, Analyze and Interpret the data to extract meaningful conclusions.
- Design, Implement and Evaluate a computer-based system to meet desired needs.
- 3. Develop IT application services with the help of different current engineering tools.

COURSE HANDOUT

PROGRAM : B.Tech. V-Sem, IT, R17 Regulations

ACADEMIC YEAR : 2021-22

COURSE NAME & CODE: DESIGN AND ANALYSIS OF ALGORITHMS & S181

L-T-P STRUCTURE : 3-1-0

COURSE CREDITS : 3

COURSE INSTRUCTOR: A. SARVANI

PRE-REQUISITE : Knowledge of Programming, Discrete Mathematics and Data

Structures

COURSE OBJECTIVE:

Students undergoing this course are expected to identify the fundamental concepts of various algorithm design techniques. Make the students familiar to conduct performance evaluation of algorithms. Expertise the students with the various existing algorithm design techniques. Motivate the students to design new algorithms for various problems.

COURSE OUTCOMES (CO)

CO1: Identify the basic properties and analysis methods of algorithms and design conquer paradigm for solving a few example problems and analyze them.

CO2: Design Greedy algorithms for knapsack problem, minimum cost spanning tree, single source shortest path problem and analyze them.

CO3: Apply dynamic programming paradigm to solve travelling sales person problem,0/1 knapsack problem,Optimal binary search tree.

CO4: Apply Backtracking search methods on state space trees for few example problems.

CO5: Analyse branch and Bound search methods through problems such as 0/1 knapsack problem, Travelling sales personn problem.

COURSE ARTICULATION MATRIX (Correlation between Cos & POs, PSOs):

| COs | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |

ACADEMIC CALENDAR:

| Description | From | То | Weeks |
|----------------------------|------------|------------|-------|
| I Phase of Instructions-1 | 20.09.2021 | 06.11.2021 | 7W |
| I Mid Examinations | 08.11.2021 | 13.11.2021 | 1W |
| II Phase of Instructions | 15.11.2021 | 15.01.2022 | 9W |
| II Mid Examinations | 17.01.2022 | 22.01.2022 | 1W |
| Preparation and Practicals | 24.01.2022 | 29.01.2022 | 1W |
| Semester End Examinations | 31.01.2022 | 12.02.2022 | 2W |

EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
|--|-----------|--------|
| Assignment/Quiz – 1 | 1 | A1=5 |
| Assignment/Quiz – 2 | 2 | A2=5 |
| I-Mid Examination | 1,2 | B1=20 |
| Assignment/Quiz – 3 | 3 | A3=5 |
| Assignment/Quiz – 4 | 4 | A4=5 |
| Assignment/Quiz – 5 | 5 | A5=5 |
| II-Mid Examination | 3,4,5 | B2=20 |
| Evaluation of Assignment/Quiz Marks: A=(A1+A2+A3+A4+A5)/5 | 1,2,3,4,5 | A=5 |
| Evaluation of Mid Marks: B=75% of Max(B1,B2)+25% of Min(B1,B2) | 1,2,3,4,5 | B=20 |
| Cumulative Internal Examination : A+B | 1,2,3,4,5 | A+B=25 |
| Semester End Examinations | 1,2,3,4,5 | C=75 |
| Total Marks: A+B+C | 1,2,3,4,5 | 100 |

TEXT BOOKS

1. Ellis Horowitz, Sartaj Sahni, —Fundamentals of Computer Algorithms", Galgotia Publications.

REFERENCES

- 1. Mark Allen Weiss, —Data Structures and Algorithm Analysis in C++||, Pearson, 3/e, 2007.
- 2. Aho, Hopcroft & Ullman, —The Design and Analysis of Computer Algorithms", Addison Wesley publications.
- 3. Thomas H.Corman et al, —Introduction to Algorithms", PHI.

- 5. P. H. Dave, H. B. Dave, —Design and Analysis of Algorithms, Pearson Education, 2008.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEO I: Pursue a successful career in the area of Information Technology or its allied fields.

PEO II: Exhibit sound knowledge in the fundamentals of Information Technology and apply practical experience with programming techniques to solve real world problems.

PEO III: Able to demonstrate self-learning, life-long learning and work in teams on multidisciplinary projects.

PEO IV: Able to understand the professional code of ethics and demonstrate ethical behavior, effective communication, team work and leadership skills in their job.

PROGRAMME OUTCOMES (POs):

Engineering Graduates will be able to:

- 1. **Engineering knowledge**: Apply the knowledge of mathematics, science, engineeringfundamentals, and an engineering specialization to the solution of complex engineering problems.
- 2. **Problem analysis**: Identify, formulate, review research literature, and analyze complexengineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3. **Design/development of solutions**: Design solutions for complex engineering problems anddesign system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems: Use research-based knowledge and researchmethods including
 design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid
 conclusions.
- 5. **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modernengineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- 6. **The engineer and society**: Apply reasoning informed by the contextual knowledge to assessocietal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- 7. **Environment and sustainability**: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- 8. **Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- 9. **Individual and team work**: Function effectively as an individual, and as a member or leader indiverse teams, and in multidisciplinary settings.
- 10. **Communication**: Communicate effectively on complex engineering activities with the engineeringcommunity and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- 11. **Project management and finance**: Demonstrate knowledge and understanding of theenginee**ring and management principles and apply these to one's own work, as a member and** leader in a team, to manage projects and in multidisciplinary environments.
- 12. **Life-long learning**: Recognize the need for, and have the preparation and ability to engage inindependent and life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOMES (PSOs):

- 1. Organize, Analyze and Interpret the data to extract meaningful conclusions.
- Design, Implement and Evaluate a computer-based system to meet desired needs.
- 3. Develop IT application services with the help of different current engineering tools.

| Cumulative Internal Examination : A+B | 1,2,3,4,5 | A+B=25 |
| Semester End Examinations | 1,2,3,4,5 | C=75 |
| Total Marks: A+B+C | 1,2,3,4,5 | 100 |

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

PEO I: Pursue a successful career in the area of Information Technology or its allied fields.

PEO II: Exhibit sound knowledge in the fundamentals of Information Technology and apply practical experience with programming techniques to solve real world problems.

PEO III: Able to demonstrate self-learning, life-long learning and work in teams on multidisciplinary projects.

PEO IV: Able to understand the professional code of ethics and demonstrate ethical behavior, effective communication, team work and leadership skills in their job.

PROGRAMME OUTCOMES (POs):

Engineering Graduates will be able to:

- 1. **Engineering knowledge**: Apply the knowledge of mathematics, science, engineeringfundamentals, and an engineering specialization to the solution of complex engineering problems.
- 2. **Problem analysis**: Identify, formulate, review research literature, and analyze complexengineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3. **Design/development of solutions**: Design solutions for complex engineering problems anddesign system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- 4. **Conduct investigations of complex problems**: Use research-based knowledge and researchmethods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- 5. **Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modernengineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- 6. **The engineer and society**: Apply reasoning informed by the contextual knowledge to assessocietal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- 7. **Environment and sustainability**: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- 8. **Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- 9. **Individual and team work**: Function effectively as an individual, and as a member or leader indiverse teams, and in multidisciplinary settings.
- 10. **Communication**: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- 11. **Project management and finance**: Demonstrate knowledge and understanding of theengineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- 12. **Life-long learning**: Recognize the need for, and have the preparation and ability to engage inindependent and life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOMES (PSOs):

- 1. Organize, Analyze and Interpret the data to extract meaningful conclusions.
- 2. Design, Implement and Evaluate a computer-based system to meet desired needs.
- 3. Develop IT application services with the help of different current engineering tools.

PROGRAM : **B.Tech.(IT), V-Semester**

ACADEMIC YEAR : **2020-2021**

COURSE CODE&NAME : 17CI17&Data Communications and

Computer Networks

L-T-P STRUCTURE : **3 - -**COURSE CREDITS : **3**

COURSE INSTRUCTOR : Rajasekhar Kommaraju

PRE-REQUISITES : Communication systems.

COURSE EDUCATIONAL OBJECTIVES (CEOs):

In this course student will learn:

In this course, students will learn about Protocols, network standards, the OSI model, IP addressing, cabling, networking components and basic LAN design. Existing state of art in network protocols, architectures and its applications. Functionalities and Applications of Various OSI and TCP/IP layers.

COURSE OUTCOMES (COs):

On successful completion of the course, students will be able to:

| CO 1 | Understand how the data is transmitted from point-to-point. | | | | | | | | | |
|------|--|--|--|--|--|--|--|--|--|--|
| CO 2 | Summarize Data Link Layer Protocols. | | | | | | | | | |
| CO 3 | Analyze of different Medium Access Control protocols. | | | | | | | | | |
| CO 4 | Evaluate different routing protocols and Transport layer protocols. | | | | | | | | | |
| CO 5 | Understand the concepts of Presentation and Application Layer Protocols. | | | | | | | | | |

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

- **PEO 1** Pursue a successful career in the area of Information Technology or its allied fields.
- PEO 2 Exhibit sound knowledge in the fundamentals of Information Technology and apply practical experience with programming techniques to solve real world problems.
- PEO 3 Able to demonstrate self-learning, life-long learning and work in teams on multidisciplinary projects.
- PEO 4 Able to understand the professional code of ethics and demonstrate ethical behavior, effective communication and team work and leadership skills in their job.

PROGRAMME OUTCOMES (POs):

- **PO1** Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **PO2 Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3 Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **PO4** Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO5 Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **PO6** The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **PO7** Environment and sustainability: Understand the impact of the professional engineering solution sin societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO8** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO9** Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO10** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO12 Life-long learning**: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO1 Organize, Analyze and Interpret the data to extract meaningful conclusions.

PSO2 Design, Implement and Evaluate a computer-based system to meet desired needs.

PSO3 Develop IT application services with the help of different current engineering tools.

Part - C

EVALUATION PROCESS:

| Evaluation Task | Units | Marks |
|--|-----------|-------|
| Assignment- 1 | 1 | A1=5 |
| Assignment- 2 | 2 | A2=5 |
| I-Mid Examination | 1,2 | B1=20 |
| Online Quiz-1 | 1,2 | C1=10 |
| Assignment- 3 | 3 | A3=5 |
| Assignment- 4 | 4 | A4=5 |
| Assignment- 5 | 5 | A5=5 |
| II-Mid Examination | 3,4,5 | B2=20 |
| Online Quiz-2 | 3,4,5 | C2=10 |
| Evaluation of Assignment: A=Avg (Best of Four (A1, A2, A3, A4,A5)) | 1,2,3,4,5 | A=5 |
| Evaluation of Mid Marks: B=75% of Max (B1, B2) +25% of Min (B1, B2) | 1,2,3,4,5 | B=20 |
| Evaluation of Online Quiz Marks: C=75% of Max(C1,C2)+25% of Min(C1,C2) | 1,2,3,4,5 | C=10 |
| Attendance Marks based on Percentage of attendance | | D=5 |
| Cumulative Internal Examination: A+B+C+D | 1,2,3,4,5 | 40 |
| Semester End Examinations: E | 1,2,3,4,5 | 60 |
| Total Marks: A+B+C+D+E | 1,2,3,4,5 | 100 |

ACADEMIC CALENDAR:

| 110112 211110 0111211111 | | | | | |
|-----------------------------|----------|------------|-------|--|--|
| Description | From | То | Weeks | | |
| Commencement of Class Work | | 17/08/2020 | | | |
| I Phase of Instructions | 17/08/20 | 03/10/20 | 7W | | |
| I Mid Examinations | 28/09/20 | 03/10/20 | 1W | | |
| II Phase of Instructions | 05/10/20 | 28/11/20 | 7W | | |
| II Mid Examinations | 23/11/20 | 28/11/20 | 1W | | |
| Preparation and Practical's | 30/11/20 | 05/12/20 | 1W | | |
| Semester End Examinations | 07/12/20 | 21/12/20 | 2W | | |

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

- **PEO 1** Pursue a successful career in the area of Information Technology or its allied fields.
- PEO 2 Exhibit sound knowledge in the fundamentals of Information Technology and apply practical experience with programming techniques to solve real world problems.
- PEO 3 Able to demonstrate self-learning, life-long learning and work in teams on multidisciplinary projects.
- PEO 4 Able to understand the professional code of ethics and demonstrate ethical behavior, effective communication and team work and leadership skills in their job.

PROGRAMME OUTCOMES (POs):

- **PO1** Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **PO2 Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3 Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- **PO4** Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO5 Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **PO6** The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **PO7** Environment and sustainability: Understand the impact of the professional engineering solution sin societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO8** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO9** Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO10** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO12 Life-long learning**: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

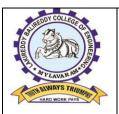

PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO1 Organize, Analyze and Interpret the data to extract meaningful conclusions.

PSO2 Design, Implement and Evaluate a computer-based system to meet desired needs.

PSO3 Develop IT application services with the help of different current engineering tools.

DEPARTMENT OF INFORMATION TECHNOLOGY

COURSE HANDOUT

Part-A

PROGRAM : **B.Tech.(IT), V-Semester**

ACADEMIC YEAR : **2021-2022**

COURSE CODE&NAME : 17CI17&Data Communications and

Computer Networks

L-T-P STRUCTURE : 3 - -

COURSE CREDITS : 3

COURSE INSTRUCTOR : Rajasekhar Kommaraju

PRE-REQUISITES : Communication systems.

COURSE EDUCATIONAL OBJECTIVES (CEOs):

In this course student will learn:

In this course, students will learn about Protocols, network standards, the OSI model, IP addressing, cabling, networking components and basic LAN design. Existing state of art in network protocols, architectures and its applications. Functionalities and Applications of Various OSI and TCP/IP layers.

COURSE OUTCOMES (COs):

On successful completion of the course, students will be able to:

| CO 1 | Understand how the data is transmitted from point-to-point. | | | | | |
|------|--|--|--|--|--|--|
| CO 2 | Summarize Data Link Layer Protocols. | | | | | |
| CO 3 | Analyze of different Medium Access Control protocols. | | | | | |
| CO 4 | Evaluate different routing protocols and Transport layer protocols. | | | | | |
| CO 5 | Understand the concepts of Presentation and Application Layer Protocols. | | | | | |

Course Articulation Matrix (Correlation between COs&POs,PSOs):

| COs | PO1 | PO2 | PO3 | PO4 | PO5 | P06 | PO7 | PO8 | PO9 | PO10 | PO11 | PO12 | PSO1 | PSO2 | PSO3 |
|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|------|------|
| CO1 | 2 | 2 | 2 | - | - | - | - | - | - | - | - | 1 | 3 | 1 | 2 |
| CO2 | 1 | 2 | 2 | - | - | - | - | - | - | - | - | 1 | 3 | 1 | 2 |
| соз | 1 | 3 | 3 | - | - | - | - | - | - | - | - | 1 | 3 | 2 | 2 |

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs):

- **PEO 1** Pursue a successful career in the area of Information Technology or its allied fields.
- PEO 2 Exhibit sound knowledge in the fundamentals of Information Technology and apply practical experience with programming techniques to solve real world problems.
- PEO 3 Able to demonstrate self-learning, life-long learning and work in teams on multidisciplinary projects.
- PEO 4 Able to understand the professional code of ethics and demonstrate ethical behavior, effective communication and team work and leadership skills in their job.

PROGRAMME OUTCOMES (POs):

- **PO1** Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3 Design/development of solutions**: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

- **PO4** Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO5 Modern tool usage**: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **PO6** The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- **PO7** Environment and sustainability: Understand the impact of the professional engineering solution sin societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO8 Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO9** Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO10** Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11** Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO12 Life-long learning**: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

- **PSO1** Organize, Analyze and Interpret the data to extract meaningful conclusions.
- **PSO2** Design, Implement and Evaluate a computer-based system to meet desired needs.
- **PSO3** Develop IT application services with the help of different current engineering tools.

DEPARTMENT OF INFORMATION TECHNOLOGY

COURSE HANDOUT

PROGRAM : B.Tech.,V-Sem., IT - R17 Regulation

ACADEMIC YEAR : 2020-21

COURSE NAME & CODE: Data Communications and Computer Networks Lab–17IT62

L-T-P STRUCTURE : 0-0-2

COURSE CREDITS : 1

COURSE INSTRUCTOR :K.Rajasekhar/ K. Raviteja

PRE-REQUISITE : Basic Computer Fundamentals, Programming on C

COURSE OBJECTIVE: In this course student will learn about how to build and understanding the fundamental concepts of computer networking and gain expertise in some specific areas of networking such as the design and maintenance of individual networks.

COURSE OUTCOMES (CO)

CO1: Independently understand basic computer network technology

CO2: Manage Data Communications System and its components

CO3: Familiarity with the basic protocols of computer networks, and how they can be used to assist in network design and implementation

CO4: Improve individual / team work skills, communication & report writing skills with ethical values.

COURSE ARTICULATION MATRIX (Correlation between COs&POs,PSOs):

| COs | PO 1 | PO 2 | PO 3 | PO 4 | PO 5 | PO 6 | PO 7 | PO 8 | PO 9 | PO 10 | PO 11 | PO 12 | PSO 1 | PSO 2 | PSO 3 |

COURSE DELIVERY PLAN (LESSON PLAN): Section-A

| S.No. | Programs to be covered | No. of Classes Required | Tentative Date of Completion | Actual Date of Completion | Teaching Learning Methods | HOD Sign Weekly |
|-------|--|-------------------------------|------------------------------------|---------------------------|---------------------------------|-----------------------|
| 1. | Study of different types of network cables and practically implement the cross wired cable and straight through cable using crimping tool. • Study of Network devices in detail • Study of network IP | 2 | 20-08-2020 | | TLM8/TLM5 | |
| 2. | Understanding and using of commands like ipconfig,netstat, ping, ARP, Telnet, FTP, finger, tracert, whois etc | 2 | 27-08-2020 | | TLM8/TLM5 | |
| 3. | Implement data link layer framing methods such as character stuffing and bit stuffing. | 2 | 03-09-2020 07-09-2020 | | TLM8/TLM5/TLM4 | |
| 4. | Write a program for Hamming code generation for error detection and correction | 2 | 14-09-2020 21-09-2020 | | TLM8/TLM5/TLM4 | |
| 5. | Implement the three CRC polynomials – CRC12, CRC16 and CRC CCIP on a data set | 2 | 28-09-2020 05-10-2020 | | TLM8/TLM5/TLM4 | |

| | of characters | | | |
|----|---|---|--------------------------|-----------|
| 6. | Implementation of Dijkstra's algorithm to compute the shortest path of a graph. | 2 | 12-10-2020 19-10-2020 | TLM8/TLM5 |
| 7. | Write a program for Distance vector Algorithm find suitable path for transmission. | 2 | 26-10-2020 02-11-2020 | TLM8/TLM5 |
| 8. | Write a program for congestion control using leaky bucket algorithm. | 2 | 09-11-2020 | TLM8/TLM5 |
| 9. | Lab-Internal- | 2 | 16-11-2020 | |

| Teaching Learning Methods | | | | | |
|---------------------------|----------------|------|--------------------|------|----------------|
| TLM1 | Chalk and Talk | TLM4 | Problem Solving | TLM7 | Seminars or GD |
| TLM2 | PPT | TLM5 | Programming | TLM8 | Lab Demo |
| ТLМЗ | Tutorial | TLM6 | Assignment or Quiz | TLM9 | Case Study |

EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
|--|-------|----------------|
| Internal Lab Exam-I | 1,2,3 | A1= 20 |
| Internal Lab Exam-II | 1,2,3 | A2= 20 |
| Day to Day Evaluation | 1,2,3 | B= 10 |
| Record | 1,2,3 | C= 5 |
| Attendance | | D= 5 |
| Evaluation of Internal Lab Exam Marks: A=(A1+A2)/2 | 1,2,3 | A= 20 |
| Cumulative Internal Examination: A+B+C | 1,2,3 | A+B+C+D =40 |
| Semester End Examinations | 1,2,3 | E=60 |
| Total Marks: A+B+C+D | 1,2,3 | 100 |

PROGRAMME OUTCOMES (POs):

| PO 2 Problem analysis: Identify, formulate, review research literature, and analyze completengineering problems reaching substantiated conclusions using first principles of mathematic natural sciences, and engineering sciences. PO 3 Design/development of solutions: Design solutions for complex engineering problems are design system components or processes that meet the specified needs with appropria consideration for the public health and safety, and the cultural, societal, and environment considerations. PO 4 Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. PO 5 Modern tool usage: Create, select, and apply appropriate techniques, resources, and model engineering and IT tools including prediction and modelling to complex engineering activition with an understanding of the limitations PO 6 The engineer and society: Apply reasoning informed by the contextual knowledge to assessocietal, health, safety, legal and cultural issues and the consequent responsibilities relevant the professional engineering practice PO 7 Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and nee for sustainable development. PO 8 Ethics: Apply ethical principles and commit to professional ethics and responsibilities are norms of the engineering practice. PO 9 Individual and team work: Function effectively as an individual, and as a member or leader in effective reports and design documentation, make effective presentations, and give and receive clear instructions. PO 10 Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clea | PO 1 | Engineering knowledge : Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering |

COURSE HANDOUT

PROGRAM : B.Tech., V-Sem., IT - R17 Regulation

ACADEMIC YEAR : 2020-21

COURSE NAME & CODE: Data Communications and Computer Networks Lab–17IT62

L-T-P STRUCTURE : 0-0-2

COURSE CREDITS : 1

COURSE INSTRUCTOR :K.Rajasekhar/ K. Raviteja

PRE-REQUISITE : Basic Computer Fundamentals, Programming on C

COURSE OBJECTIVE: In this course student will learn about how to build and understanding the fundamental concepts of computer networking and gain expertise in some specific areas of networking such as the design and maintenance of individual networks.

COURSE OUTCOMES (CO)

CO1: Independently understand basic computer network technology

CO2: Manage Data Communications System and its components

CO3: Familiarity with the basic protocols of computer networks, and how they can be used to assist in network design and implementation

CO4: Improve individual / team work skills, communication & report writing skills with ethical values.

ACADEMIC CALENDAR:

| Description | From | То | Weeks | | | |
|-----------------------------|----------|------------|-------|--|--|--|
| Commencement of Class Work | | 17/08/2020 | | | | |
| I Phase of Instructions | 17/08/20 | 03/10/20 | 7W | | | |
| I Mid Examinations | 28/09/20 | 03/10/20 | 1W | | | |
| II Phase of Instructions | 05/10/20 | 28/11/20 | 7W | | | |
| II Mid Examinations | 23/11/20 | 28/11/20 | 1W | | | |
| Preparation and Practical's | 30/11/20 | 05/12/20 | 1W | | | |
| Semester End Examinations | 07/12/20 | 21/12/20 | 2W | | | |

EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
|--|-------|----------------|
| Internal Lab Exam-I | 1,2,3 | A1= 20 |
| Internal Lab Exam-II | 1,2,3 | A2= 20 |
| Day to Day Evaluation | 1,2,3 | B= 10 |
| Record | 1,2,3 | C= 5 |
| Attendance | | D= 5 |
| Evaluation of Internal Lab Exam Marks: A=(A1+A2)/2 | 1,2,3 | A= 20 |
| Cumulative Internal Examination: A+B+C | 1,2,3 | A+B+C+D =40 |
| Semester End Examinations | 1,2,3 | E=60 |
| Total Marks: A+B+C+D | 1,2,3 | 100 |

PROGRAMME OUTCOMES (POs):

| PO 1 | Engineering knowledge : Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. |
|-------|---|
| PO 2 | Problem analysis : Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. |
| PO 3 | Design/development of solutions : Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations. |
| PO 4 | Conduct investigations of complex problems : Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. |
| PO 5 | Modern tool usage : Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations |
| PO 6 | The engineer and society : Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice |
| PO 7 | Environment and sustainability : Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. |
| PO 8 | Ethics : Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice. |
| PO 9 | Individual and team work : Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings. |
| PO 10 | Communication : Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |
| PO 11 | Project management and finance : Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments. |
| PO 12 | Life-long learning : Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. |

PROGRAMME SPECIFIC OUTCOMES (PSOs):

| PSO 1 | Organize, Analyze and Interpret the data to extract meaningful conclusions. |
|-------|---|
| PSO 2 | Design, Implement and Evaluate a computer-based system to meet desired needs. |
| PSO 3 | Develop IT application services with the help of different current engineering tools. |

COURSE HANDOUT

PART – A

Name of Course Instructor : Mr. K.SASI BHUSHAN

Course Name & Code : MICROPROCESSORS AND MICROCONTROLLERS [17EC22] L-T-P Structure : 3-0-0 Credits : 3 Program/Sem/Sec : B.Tech., IT., V-Sem., Sections- A A.Y : 2021-22

Pre-requisites: Digital Circuits, Computer organization

Course Educational Objectives: In this course student will learn about the Architecture of 8086 Microprocessor and 8051 Microcontroller and their Assembly Language Programming, interfacing Memory and Various Peripherals with 8086 Microprocessor/8051 Microcontroller and concepts of Interrupts and Serial Communication in reference to 8086

COURSE OUTCOMES (COs): At the end of the course, students are able to

CO 1 : Understand the architecture and operation of 8086 μprocessor & 8051μcontroller

CO 2 : Apply the instructions of 8086/8051 for various applications.

CO 3 : Analyze the operation of peripherals and devices for interfacing applications.

CO4 : Design a 8086/8051 based system by interfacing memory, peripherals and I/O devices

BOS APPROVED TEXT BOOKS:

- T1 Douglas V. Hall, "Micro Processors & Interfacing", TMH, 2007.
- T2 A. K. Ray and K.M. Bhurchandi, Advanced Microprocessor And Peripherals, 2nd Edition TMH Publishers.
- T3 Muhammad Ali Mazidi, Janice GillispieMazidi, Rolin D. Mckinlay "Microcontrollers and Embedded System", Pearson Education Publishers, 2nd Edition

BOS APPROVED REFERENCE BOOKS:

- R1 Raj Kamal, Microcontrollers Architecture, Programming, Interfacing and System Design, Pearson Education Publishers.
- R2 J. K. Uffenbeck, "The 8088 and 8086 Micro Processors", PHI, 4th Edition, 2003.
- R3 Ajay Deshmukh, "Micro Controllers-Theory and Applications", Tata McGraw Hill Publishers.
- **R4** Kenneth J. Ayala, "The 8051 Micro Controller", Cengage Learning Publishers, 3rd Edition, 2000.

Prescribed Syllabus:

17EC22 - MICROPROCESSORS AND MICROCONTROLLERS

UNIT - I

Microprocessor Architecture: Introduction to Microprocessors-Purpose of a Microprocessor, different types of Microprocessors, their features and their comparison; 8086 Microprocessor-Architecture, Special functions of General purpose registers, 8086 flag register and function of 8086 Flags, Addressing modes of 8086.

Instruction Set: Instruction set of 8086, Assembly language programs involving logical, Branch and Call instructions, Sorting, Evaluation of Arithmetic Expressions, String manipulation, Assembler directives, simple programs, procedures and macros.

UNIT - II

8086 Memory and I/O Interfacing: Pin diagram of 8086, Minimum mode and maximum mode of operation, Timing diagram, Memory (Static RAM & EPROM) and I/O interfacing to 8086. Interrupt structure of 8086, Interrupt Vector table, Interrupt service routines.

UNIT - III

Peripherals and Devices: DMA Controller 8237, Interrupt Controller 8259 and Cascading, USART 8251 8255 PPI – various modes of operation, Keyboard, D/A and A/D converter interfacing.

UNIT - IV

Microcontroller: 8051 Microcontroller Architecture, Pin Diagram, Addressing modes, Instruction Set and Programs, 8051 Memory and I/O interfacing.

UNIT - V

8051 Interfacing: Modes of timer operation, Serial port operation, Interrupt structure of 8051, Interfacing of Seven segment Displays, Stepper Motor and Serial/Parallel Printer

| | by interfacing memory, peripherals | | | | | |
| | and I/O devices | | | | | |

PART - D

PROGRAMME OUTCOMES (POs):

| PO 1: | Engineering knowledge: Apply the knowledge of mathematics, science, engineering |
|--------------|--|
| | fundamentals, and an engineering specialization to the solution of complex engineering |
| | problems. |
| PO 2: | Problem analysis : Identify, formulate, review research literature, and analyze complex |
| | engineering problems reaching substantiated conclusions using first principles of |
| | mathematics, natural sciences, and engineering sciences. |
| PO 3: | Design/development of solutions: Design solutions for complex engineering problems |
| | and design system components or processes that meet the specified needs with |
| | appropriate consideration for the public health and safety, and the cultural, societal, and |
| | environmental considerations. |
| PO 4: | Conduct investigations of complex problems: Use research-based knowledge and |
| | research methods including design of experiments, analysis and interpretation of data, |
| | and synthesis of the information to provide valid conclusions. |
| PO 5: | Modern tool usage: Create, select, and apply appropriate techniques, resources, and |
| | modern engineering and IT tools including prediction and modelling to complex |
| | engineering activities with an understanding of the limitations |
| PO 6: | The engineer and society : Apply reasoning informed by the contextual knowledge to |
| | assess societal, health, safety, legal and cultural issues and the consequent |
| | responsibilities relevant to the professional engineering practice |
| PO 7: | Environment and sustainability: Understand the impact of the professional |
| | engineering solutions in societal and environmental contexts, and demonstrate the |
| DO 0 | knowledge of, and need for sustainable development. |
| PO 8: | Ethics : Apply ethical principles and commit to professional ethics and responsibilities |
| PO 9: | and norms of the engineering practice. |
| PO 9: | Individual and team work : Function effectively as an individual, and as a member or |
| PO 10: | leader in diverse teams, and in multidisciplinary settings. Communication: Communicate effectively on complex engineering activities with the |
| FO 10: | engineering community and with society at large, such as, being able to comprehend |
| | and write effective reports and design documentation, make effective presentations, and |
| | give and receive clear instructions. |
| PO 11: | Project management and finance : Demonstrate knowledge and understanding of the |
| | engineering and management principles and apply these to one's own work, as a |
| | member and leader in a team, to manage projects and in multidisciplinary environments. |
| PO 12: | Life-long learning : Recognize the need for, and have the preparation and ability to |
| | engage in independent and life-long learning in the broadest context of technological |
| | change. |
| | |

PROGRAMME SPECIFIC OUTCOMES (PSOs):

| 1100 | HUMINIE BI ECH TO GET COMES (1 505). | | | | | | |
|---------------|--|--|--|--|--|--|--|
| PSO 1: | Communication: Design and develop modern communication technologies for | | | | | | |
| | building the inter disciplinary skills to meet current and future needs of industry. | | | | | | |
| PSO 2: | VLSI and Embedded Systems: Design and Analyze Analog and Digital Electronic | | | | | | |
| | Circuits or systems and Implement real time applications in the field of VLSI and | | | | | | |
| | Embedded Systems using relevant tools | | | | | | |
| PSO 3: | Signal Processing: Apply the Signal processing techniques to synthesize and realize | | | | | | |
| | the issues related to real time applications | | | | | | |

DEPARTMENT OF INFORMATION TECHNOLOGY

COURSE HANDOUT

PART – A

Name of Course Instructor : Mr. K.SASI BHUSHAN

Course Name & Code : MICROPROCESSORS AND MICROCONTROLLERS [17EC22] L-T-P Structure : 3-0-0 Credits : 3 Program/Sem/Sec : B.Tech., IT., V-Sem., Sections- B A.Y : 2021-22

Pre-requisites: Digital Circuits, Computer organization

Course Educational Objectives: In this course student will learn about the Architecture of 8086 Microprocessor and 8051 Microcontroller and their Assembly Language Programming, interfacing Memory and Various Peripherals with 8086 Microprocessor/8051 Microcontroller and concepts of Interrupts and Serial Communication in reference to 8086

COURSE OUTCOMES (COs): At the end of the course, students are able to

CO 1 : Understand the architecture and operation of 8086 μprocessor & 8051μcontroller

CO 2 : Apply the instructions of 8086/8051 for various applications.

CO 3 : Analyze the operation of peripherals and devices for interfacing applications.

CO4 : Design a 8086/8051 based system by interfacing memory, peripherals and I/O devices

- R3 Ajay Deshmukh, "Micro Controllers-Theory and Applications", Tata McGraw Hill Publishers.
- **R4** Kenneth J. Ayala, "The 8051 Micro Controller", Cengage Learning Publishers, 3rd Edition, 2000.

Prescribed Syllabus:

17EC22 - MICROPROCESSORS AND MICROCONTROLLERS

UNIT - I

Microprocessor Architecture: Introduction to Microprocessors-Purpose of a Microprocessor, different types of Microprocessors, their features and their comparison; 8086 Microprocessor-Architecture, Special functions of General purpose registers, 8086 flag register and function of 8086 Flags, Addressing modes of 8086.

Instruction Set: Instruction set of 8086, Assembly language programs involving logical, Branch and Call instructions, Sorting, Evaluation of Arithmetic Expressions, String manipulation, Assembler directives, simple programs, procedures and macros.

UNIT - II

8086 Memory and I/O Interfacing: Pin diagram of 8086, Minimum mode and maximum mode of operation, Timing diagram, Memory (Static RAM & EPROM) and I/O interfacing to 8086. Interrupt structure of 8086, Interrupt Vector table, Interrupt service routines.

UNIT - III

Peripherals and Devices: DMA Controller 8237, Interrupt Controller 8259 and Cascading, USART 8251 8255 PPI – various modes of operation, Keyboard, D/A and A/D converter interfacing.

UNIT - IV

Microcontroller: 8051 Microcontroller Architecture, Pin Diagram, Addressing modes, Instruction Set and Programs, 8051 Memory and I/O interfacing.

UNIT - V

8051 Interfacing: Modes of timer operation, Serial port operation, Interrupt structure of 8051, Interfacing of Seven segment Displays, Stepper Motor and Serial/Parallel Printer

PART - D

PROGRAMME OUTCOMES (POs):

| PO 1: | Engineering knowledge: Apply the knowledge of mathematics, science, engineering |
|--------|---|
| | fundamentals, and an engineering specialization to the solution of complex engineering |
| | problems. |
| PO 2: | Problem analysis : Identify, formulate, review research literature, and analyze complex |
| | engineering problems reaching substantiated conclusions using first principles of |
| | mathematics, natural sciences, and engineering sciences. |
| PO 3: | Design/development of solutions : Design solutions for complex engineering problems |
| | and design system components or processes that meet the specified needs with |
| | appropriate consideration for the public health and safety, and the cultural, societal, and |
| | environmental considerations. |
| PO 4: | Conduct investigations of complex problems: Use research-based knowledge and |
| | research methods including design of experiments, analysis and interpretation of data, |
| | and synthesis of the information to provide valid conclusions. |
| PO 5: | Modern tool usage: Create, select, and apply appropriate techniques, resources, and |
| | modern engineering and IT tools including prediction and modelling to complex |
| DO (| engineering activities with an understanding of the limitations |
| PO 6: | The engineer and society: Apply reasoning informed by the contextual knowledge to |
| | assess societal, health, safety, legal and cultural issues and the consequent |
| DO 5 | responsibilities relevant to the professional engineering practice |
| PO 7: | Environment and sustainability : Understand the impact of the professional |
| | engineering solutions in societal and environmental contexts, and demonstrate the |
| PO 8: | knowledge of, and need for sustainable development. Ethics : Apply ethical principles and commit to professional ethics and responsibilities |
| PU 8: | |
| PO 9: | and norms of the engineering practice. Individual and team work: Function effectively as an individual, and as a member or |
| FU 9: | leader in diverse teams, and in multidisciplinary settings. |
| PO 10: | Communication: Communicate effectively on complex engineering activities with the |
| 1010. | engineering community and with society at large, such as, being able to comprehend |
| | and write effective reports and design documentation, make effective presentations, and |
| | give and receive clear instructions. |
| PO 11: | Project management and finance : Demonstrate knowledge and understanding of the |
| 1011. | engineering and management principles and apply these to one's own work, as a |
| | member and leader in a team, to manage projects and in multidisciplinary environments. |
| PO 12: | Life-long learning : Recognize the need for, and have the preparation and ability to |
| | engage in independent and life-long learning in the broadest context of technological |
| | change. |
| | I <i>U</i> |

PROGRAMME SPECIFIC OUTCOMES (PSOs):

| PSO 1: | Communication: Design and develop modern communication technologies for | | | | | | |
|---------------|--|--|--|--|--|--|--|
| | building the inter disciplinary skills to meet current and future needs of industry. | | | | | | |
| PSO 2: | VLSI and Embedded Systems: Design and Analyze Analog and Digital Electronic | | | | | | |
| | Circuits or systems and Implement real time applications in the field of VLSI and | | | | | | |
| | Embedded Systems using relevant tools | | | | | | |
| PSO 3: | Signal Processing: Apply the Signal processing techniques to synthesize and realize | | | | | | |
| | the issues related to real time applications | | | | | | |

Course Name : MICROPROCESSORS AND MICROCONTROLLERS LAB

Course Code : 17EC70

L-T-P Structure : 0-2-0 Credits : 2 Program/Sem/Sec : B.Tech., IT., V-Sem., Sections- A A.Y : 2021 - 22

Pre-requisites: Pulse and switching circuits lab

Course Educational Objectives: In this course, student will understand working of instructions

by practicing programs of 8086 / 8051 and develop applications by interfacing devices.

COURSE OUTCOMES (COs): At the end of the course, students are able to

CO 1 : Demonstrate program proficiency using the various instructions of the 8086

microprocessor / 8051 microcontroller.

CO 2 : Apply different programming techniques like loops, subroutines for various

applications.

CO 3 : Analyze systems for different applications by interfacing external devices.

Prescribed Syllabus:

17EC70 - MICROPROCESSORS AND MICROCONTROLLERS LAB

LIST OF EXPERIMENTS

Part-1: 8086 programs:

- 1. Program to demonstrate data transfer operation
- 2. Program to demonstrate arithmetic operation
- 3. Program to demonstrate logical operation
- 4. Program to demonstrate shift operation
- 5. Program to demonstrate string operation
- 6. Program to demonstrate looping operation
- 7. Program to demonstrate decision making operations

PART-2: 8051 PROGRAMS:

- 8. Programs to demonstrate bit-manipulation operations.
- 9. Programs using Interrupts
- 10. Programming timer / counter.
- 11. Programming Serial communication application.
- 12. Program to demonstrate decision making operations
- 13. Program to demonstrate looping operations

PART-3: INTERFACING PROGRAMS (using 8086 & 8051 kits)

- 14. Interfacing ADC
- 15. Interfacing DAC.
- 16. Interfacing stepper motor.
- 17. Interfacing 7-segment display.
- 18. Interfacing keyboard.
- 19. Interfacing serial/parallel Printer.

PART-: INTERFACING PROGRAMS (using 8086 & 8051 kits or MASM Tool)

20. Interfacing Programs for content beyond the syllabus.

$\underline{PART - B}$

| 5. | Program to demonstrate decision making operations. | 2 | 31-10-2021 | | TLM5&8 | | |
| | | CYCLE-2 | | | | | |
| 6. | Programs to demonstrate bit- manipulation operations. | 2 | 07-11-2021 | | TLM5&8 | | |
| 7. | Programs using Interrupts. | 2 | 14-11-2021 | | TLM5&8 | | |
| 8. | Programming timer / counter. | 2 | 21-11-2021 | | TLM5&8 | | |
| 9. | Programming Serial communication application. | 2 | 28-11-2021 | | TLM5&8 | | |
| 10. | Program to demonstrate decision making & looping operations. | 2 | 05-12-2021 | | TLM5&8 | | |
| | | CYCLE-3 | | | | | |
| 11. | Interfacing ADC & DAC . | 2 | 12-12-2021 | | TLM5&8 | | |
| 12. | Interfacing stepper motor. | 2 | 19-12-2021 | | TLM5&8 | | |
| 13. | Interfacing 7-segment display & keyboard. | 2 | 26-12-2021 | | TLM5&8 | | |
| 14. | Interfacing serial/parallel Printer. | 2 | 02-01-2022 | | TLM5&8 | | |
| 15. | Interfacing Programs for content beyond the syllabus. | 2 | 09-01-2022 | | TLM5&8 | | |
| 16. | Internal Examination | 2 | 23-01-2022 | | TLM5&8 | | |
| No. of | f classes required to complete: | 32 | No. of classes | conducted: | | | |

| Teaching Learning Methods | | | | | |
|---------------------------|----------------|------|---------------------------------|--|--|
| TLM1 | Chalk and Talk | TLM4 | Demonstration (Lab/Field Visit) | | |
| TLM2 | PPT | TLM5 | ICT (NPTEL/Swayam Prabha/MOOCS) | | |
| TLM3 | Tutorial | TLM6 | Group Discussion/Project | | |

$\underline{PART - C}$

Academic Calendar: 2019 – 20 (VI Semester)

| B.Tech VI Semester - 2017 Admitted Batch | | | | | |
|--|------------|------------|---------|--|--|
| Class work Commence From | | 20-09-2021 | | | |
| Description | From | То | Weeks | | |
| I Phase of Instructions | 20-09-2021 | 05-11-2021 | 7 Weeks | | |
| I Mid Examinations | 08-11-2021 | 13-11-2021 | 1 Week | | |
| II Phase Instructions | 15-11-2021 | 15-01-2022 | 9 Weeks | | |
| II Mid Examinations | 17-01-2022 | 22-01-2022 | 1 Week | | |
| Preparation & Practicals | 24-01-2022 | 29-01-2022 | 1 Week | | |
| Semester End Examinations | 31-01-2022 | 12-02-2022 | 2 Weeks | | |

EVALUATION PROCESS:

| Evaluation Task | COs | Marks |
|--|---------|-------|
| Day to Day work | 1,2,3,4 | A1=20 |
| Attendance (>95%=5, 90-95%=4,85-90%=3,80-85%=2,75-80%=1) | | A2=5 |
| Viva-Voce | 1,2,3,4 | A3=5 |
| Internal Lab Examination | 1,2,3,4 | B=10 |
| Total Internal Marks(A1+A2+A3+B) | | C=40 |
| Semester End Examinations | 1,2,3,4 | D=60 |
| Total Marks: C+D | 1,2,3,4 | 100 |

PART - D

PROGRAMME OUTCOMES (POs):

| PO 1: | Engineering knowledge: Apply the knowledge of mathematics, science, engineering |
|--------|---|
| | fundamentals, and an engineering specialization to the solution of complex engineering |
| | problems. |
| PO 2: | Problem analysis : Identify, formulate, review research literature, and analyze complex |
| | engineering problems reaching substantiated conclusions using first principles of |
| | mathematics, natural sciences, and engineering sciences. |
| PO 3: | Design/development of solutions: Design solutions for complex engineering problems and |
| | design system components or processes that meet the specified needs with appropriate |
| | consideration for the public health and safety, and the cultural, societal, and environmental |
| DO 1 | considerations. |
| PO 4: | Conduct investigations of complex problems: Use research-based knowledge and research |
| | methods including design of experiments, analysis and interpretation of data, and synthesis |
| DO 5 | of the information to provide valid conclusions. |
| PO 5: | Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern |
| | engineering and IT tools including prediction and modelling to complex engineering |
| PO 6: | activities with an understanding of the limitations The engineer and society: Apply reasoning informed by the contextual knowledge to assess |
| PO 0: | societal, health, safety, legal and cultural issues and the consequent responsibilities relevant |
| | to the professional engineering practice |
| PO 7: | Environment and sustainability: Understand the impact of the professional engineering |
| 107. | solutions in societal and environmental contexts, and demonstrate the knowledge of, and |
| | need for sustainable development. |
| PO 8: | Ethics : Apply ethical principles and commit to professional ethics and responsibilities and |
| | norms of the engineering practice. |
| PO 9: | Individual and team work : Function effectively as an individual, and as a member or |
| | leader in diverse teams, and in multidisciplinary settings. |
| PO 10: | Communication: Communicate effectively on complex engineering activities with the |
| | engineering community and with society at large, such as, being able to comprehend and |
| | write effective reports and design documentation, make effective presentations, and give and |
| | receive clear instructions. |
| PO 11: | Project management and finance: Demonstrate knowledge and understanding of the |
| | engineering and management principles and apply these to one's own work, as a member |
| | and leader in a team, to manage projects and in multidisciplinary environments. |
| PO 12: | Life-long learning : Recognize the need for, and have the preparation and ability to engage |
| | in independent and life-long learning in the broadest context of technological change. |

PROGRAMME SPECIFIC OUTCOMES (PSOs):

| 1110 | odinimie bi Echi ie oci Comes (1505). | | | | |
|---------------|---|--|--|--|--|
| PSO 1: | Communication: Design and develop modern communication technologies for building the | | | | |
| | inter disciplinary skills to meet current and future needs of industry. | | | | |
| PSO 2: | VLSI and Embedded Systems: Design and Analyze Analog and Digital Electronic | | | | |
| | Circuits or systems and Implement real time applications in the field of VLSI and | | | | |
| | Embedded Systems using relevant tools | | | | |
| PSO 3: | Signal Processing: Apply the Signal processing techniques to synthesize and realize the | | | | |
| | issues related to real time applications | | | | |
